Mass Communication in Canada examines the past, present, and future of mass communication and its effects on society. The book investigates all media from print media, film, radio, and television, to digital media such as the internet and e-mail, providing a framework

for understanding the rapidly changing field of mass communication. Themes include media theories, the mass media, media culture and politics, media content, media and audiences, law and policy, the structure and role of media ownership, journalists as content producers, technology and current issues, and globalization.

Communicating in the Third Space aims to clarify Homi K. Bhabha's theory of the third space of enunciation by reconstructing its philosophical, sociological, geographical, and political meaning with attention to the special advantages and ambiguities that arise as it is applied in practical--as well as theoretical--contexts. The idea of "third space" conceives the encounter of two distinct and unequal social groups as taking place in a special third space of enunciation where culture is disseminated and displaced from the interacting groups, making way for the invention of a hybrid identity, whereby these two groups conceive themselves to partake in a common identity relating to shared space and common dialogue. The essays collected in Communicating in the Third Space--including a preface by Bhabha himself--brilliantly introduce readers to this exciting topic in Cultural and Post-Colonial theory and offers insightful elaboration and critique of the meaning and relevance of life in the "third space." With a preface by Homi K. Bhabha.

Grandmother Andre told stories in front of a campfire. Elizabeth Goudie wrote a memoir in school scribbles. Phyllis Knight taped hours of interviews with her son. Today's families rely on television and video cameras. They are all making history. In a different approach to that old issue, 'the Canadian identity,' Gerald Friesen links the media studies of Harold Innis to the social history of recent decades. The result is a framework for Canadian history as told by ordinary people. Friesen suggests that the common peoples' perceptions of time and space in what is now Canada changed with innovations in the dominant means of communication. He defines four communication-based epochs in Canadian history: the oral-traditional world of pre-contact Aboriginal people; the textual-settler household of immigrants; the print-capitalism of the nineteenth and twentieth centuries; and the screen-capitalism that has emerged in the last few decades. This analysis of communication is linked to distinctive political economies, each of which incorporates its predecessors in an increasingly complex social order. In each epoch, using the new communication technologies, people struggled to find the political means by which they could ensure that they and their households survived and, if they were lucky, prospered. Canada is the sum of their endeavours. "Citizens and Nation" demonstrates that it is possible to find meaning in the nation's past that will interest, among others, a new, young, and multicultural reading audience.

Effective risk communication is essential to the well-being of any organization and those people who depend on it. Ineffective communication can cost lives, money and reputations. Communicating Risks and Benefits: An Evidence-Based User's Guide provides the scientific foundations for effective communications. The book authoritatively summarizes the relevant research, draws out its implications for communication design, and provides practical ways to evaluate and improve communications for any decision involving risks and benefits. Topics include the communication of quantitative information and warnings, the roles of emotion and the news media, the effects of age and literacy, and tests of how well communications meet the organization's goals. The guide will help users in any organization, with any budget, to make the science of their communications as sound as the science that they are communicating.
