psychologists, social workers, police and the many other professionals who work in this field.' The Honourable Alastair Nicholson, former Chief Justice of the Family Court of Australia A ground-breaking, comprehensive, honest, well researched and courageous book that should be essential reading for all politicians and professionals involved in both the Family Court of Australia and state child protection systems.' Emeritus Professor Freda Briggs AO Child abuse in the context of parental separation and divorce is not a malicious allegation, nor a misunderstanding. It is a real and growing problem with very young children as the primary victims. Child Abuse and Family Law draws on pioneering research to identify the causes, features and impact of child abuse in parental separation and divorce. The authors argue that professionals working with these families need to better understand the specific and often severe nature of this abuse to improve outcomes for both the children and their families. The authors develop a much-needed practice framework for all socio-legal professionals involved in the family law system. Using case studies, they take a multi-disciplinary approach to outline strategies for family lawyers, child legal representatives, social workers, child protection workers, psychologists, psychiatrists, health workers and teachers.

This reference guide to Australian family law explains legislation, relevant case law, and legal procedures, aimed at a wide audience of lawyers, counsellors, finance industry professionals, and students. Specialist chapters have been grouped into the areas of the family law legal system and practice; children; property; financial agreements; financial support for children; de facto relationships; and court processes, evidence and costs, and discusses issues including allegations of parental alienation syndrome, family violence, mental health problems and drug abuse. Since the preceding edition, significant changes have occurred relating to de facto relationships, regarding property, financial agreements and spousal maintenance for both heterosexual and same sex couples. Chapters have been updated, and include: Commonwealth, states, family law legislation and courts, by John Fogarty; Legal practice matters: client interview and drafting affidavits, by Genevieve Dee; Divorce, by Louise Hennessy; Shared parental responsibility, by Anne-Marie Rice; Dispute resolution and family relationship centres, by Anne-Marie Rice; Parenting orders, plans and guidelines, by Anne-Marie Rice; Principles the court must consider when conducting child-related proceedings, by Karen Williams; Major long-term issues, by Anne-Marie Rice; Child abduction, by Anne-Marie Rice; Order enforcement and non-compliance in children's cases, by William Keough; Children and relationship factors, by Renata Alexander; Property and the four-step process, by Jacqueline Campbell and Grant T Riethmuller; Maintenance, by Jacqueline Campbell; Bankruptcy and third parties, by Stephen Mullette; Corporations and trusts, by Louise Hennessy; Taxation considerations; Property orders, by Chris Othen; Superannuation, by Jacky Campbell with Shane Williams; Financial agreements, by Jacky Campbell and Luke Seivers; Child

support and maintenance, by Grant T Riethmuller; De facto relationships; Evidence, by Genevieve Dee; Court procedure, by Chris Othen; Costs, by Suzanne Dowey and updated by Peter Trimbos.

Traditional ideas of mediator neutrality and impartiality have come under increasing attack in recent decades. There is, however, a lack of consensus on what should replace them. Mediation Ethics offers a response to this question, developing a new theory of mediation that emphasises its nature as a relational process.

The Family in Law provides a jurisprudential analysis of current family law, connecting doctrinal discourse with sociological, historical and economic analyses of the institution of family. The law's focus on the nuclear family as the default model is central to the book's discourse, which contains in-depth discussions of the key areas of family law - marriage, divorce, children and property matters. Written for Australian legal actors - whether students, academics or professionals - readers are encouraged to question current frameworks, critique well-known cases and make informed conclusions on whether changes could be made to engender a fairer and more equitable society. In developing doctrinal analysis within a theoretical framework, The Family in Law challenges the conventional boundaries of family law, providing readers with both a solid foundation and a multi-layered perspective to their understanding of the topic.

This volume contains the contributions delivered at CEFLÆ's sixth international conference, which focused on comparative and international family law in Europe in their respective cultural contexts.

This book brings together the expertise of two authors involved in initiating the development of Online Family Dispute Resolution (OFDR), while also examining the unique Australian system. The family arena generally comprises property or child-related disputes arising between parents, whether married or not, and whether the parties have lived together or not. A special feature of Australia's OFDR system is that it deals with children's issues rather than focusing on property distribution. The book first discusses how technological innovations have transformed dispute resolution services to families. It explores the need for OFDR and how such systems can potentially be implemented. In turn, the coverage shifts to screening tools used prior to a Family Dispute Resolution session to ensure that online systems are appropriate for the case under dispute and the people involved. Readers will then learn about the necessary training required - for administrators, practitioners and clients alike - for OFDR to be successful. In addition, the book offers a comprehensive evaluation of the system and reflects on the lessons learned to date. In closing, it suggests ways in which OFDR could be further developed and applied to family disputes around the world.

This book examines the practice of Alternative Dispute Resolution (ADR) as it stands today in the context of matrimonial disputes and for providing gender justice for women undergoing matrimonial litigation. ADR is a fairly recent but increasingly prevalent phenomenon that has significantly evolved due to the failure of the adversarial process of litigation to provide timely resolution of disputes. The book explores the merit and demerit of traditional litigation process and emergence, socio-legal framework, work environment and success rate of various ADR processes in general and for resolving matrimonial disputes in particular. It comprehensively discusses the role of various institutions and attitudes and perceptions of ADR practitioners. It analyzes the influence of patriarchal cultural assumptions of appropriate feminine behaviour and its effect on ADR practitioners like mediators and counsellors that leads to the marginalization of aggrieved womans issues. With a brief analysis of the experience and challenges faced with the way the ADR process is conducted, the focus is on probing the vulnerability of aggrieved women. The book critiques the practice of ADR as it is today and offers constructive ways forward by providing suggestions, insights, and analysis that could bring about a transformation in the way justice is delivered to women. This in-depth study is an attempt to guide decision making by bringing forth and legitimizing the battered womens voice which often goes unrepresented, in the debate about the efficacy of ADR mechanism in resolving matrimonial disputes. The book is of interest to those working for justice for women, particularly in the context of matrimonial disputes -- legal professionals, mediators, counsellors, judges, academicians, women rights activists, researchers in the field of gender and women studies, social work and law, ADR educators, policymakers and general readers who are inclined and interested in bringing a gender perspective to their area of work.

This is the authoritative textbook on family mediation. As well as mediators, this work will be indispensable for practitioners and scholars across a wide range of fields, including social work and law. It draws on a wide cross-disciplinary theoretical literature and on the author's extensive and continuing practice experience. It encompasses developments in policy, research and practice in the UK and beyond. Roberts presents mediation as an aid to joint decision-making in the context of a range of family disputes, notably those involving children. Mediation is seen as a process of intervention distinct from legal, social work and therapeutic practice, drawing on a distinctive body of knowledge across disciplinary fields including anthropology, psychology and negotiation theory. Incorporating empirical evidence, the book emphasizes the value of mediation in mitigating the harmful effects of family breakdown and conflict. First published in 1988 as a pioneering work, this third edition has been fully updated to incorporate legal and policy developments in the UK and in Europe, new sociological and philosophical perspectives on

## Access Free Compulsory Family Dispute Resolution

respect, justice and conflict, and international research and practice innovations.

An easy to navigate guide to family law in New South Wales, Australia. This book helps women understand the law as it impacts on their relationships with ex-partners and children. The book covers family law issues including separation, divorce, arrangements for children, child support, division of property and protection against violence.

This book includes some of the papers presented and discussed at the European Regional Conference of the International Society of Family Law (ISFL), held in Tossa de Mar and Girona on the 9th and 10th of October 2003.\n
