This text helps students understand the tremendous variability in aging and introduces them to careers working with older adults. This new edition reflects the continued changes in the way we age. The fourth edition has been updated to include emerging issues in aging. These include the prevalence of HIV/AIDs in later life, current research on mental potential in old age, the creation of age-friendly cities, and new options for end-of-life care. Each chapter begins with a set of learning objectives to guide students in their reading, and concludes with a list of main points, questions for discussion or study, suggested readings, and relevant web sites to consult. Telling the story of Saints football in New Orleans is a way to understand larger social, political and economic conditions during pivotal moments of the city ' s history. This book is the first to explore the team ' s role in rebuilding the city following Hurricane Katrina. The author documents New Orleans ' initial efforts to attract professional football, the Katrina disaster and some successes and failures during 10 years of post-disaster recovery. The narrative of community recovery and cohesion crafted by Saints fans transcends racial divides and illustrates the relationship between professional sports and the American city. The voices of female fans—largely overlooked in the study of sports—compel a more inclusive definition of football fandom.
