Motivation - Early & contemporary theories of motivation
ERG Theory of Motivation Clayton Alderfer modified Maslow's hierarchy of needs theory of motivation in harmony with experimental research and explained it in his own way. His revised work is known as the ERG theory of motivation. He reclassified Maslow's need hierarchy theory into three easier and wider classifications of needs:

Modern Theories of Motivation | HubPages
Maslow's need hierarchy theory is a significant contribution to the managerial motivation concept. It is very simple and enables the manager to understand human behaviour at workplace. According to the theory, the manager should consider higher level needs after the lower level needs are satisfied.

Strong communications skills are essential for dietetics professionals helping patients improve their nutrition and eating habits. Based on the 2002 Commission on Accreditation in Dietetics (CADE) standards for education, this text aids nutritionists, dietitians, and allied health professionals in strengthening interpersonal relationships with clients and patients by offering current activities, case studies, techniques, and directives related to nutritional counseling. The Fourth Edition is updated with a guide to online resources, behavioral objectives, additional case studies, and new illustrations. The American Dietetic Association's competencies on communication are included. Also included is an online instructor's manual containing answers to the review and discussion questions, as well as information on each case study.

Introduction to Business covers the scope and sequence of most introductory business courses. The book provides detailed explanations in the context of core themes such as customer satisfaction, ethics, entrepreneurship, global business, and managing change. Introduction to Business includes hundreds of current business examples from a range of industries and geographic locations, which feature a variety of individuals. The outcome is a balanced approach to the theory and application of business concepts, with attention to the knowledge and skills necessary for student success in this course and beyond.

It is widely recognised that science explorations is vital in children's lives as they make sense of the world. Now in its fourth edition, Science in Early Childhood provides a comprehensive and engaging introduction to science in the early years. Each chapter has been updated to include current research and to address changing priorities in early childhood science education. The text features new chapters on Indigenous ways of knowing science, inquiry approaches to learning science and teaching science inclusively. Science in Early Childhood complements the Australian Early Years Learning Framework and the Australian Curriculum: Science. Concepts, processes and skills are brought to life through detailed case studies, practical tasks and reflective activities. Instructors can also supplement learning by drawing on the extensive materials located on the companion website. Renowned for its accessible and informative content, Science in Early Childhood is essential for all pre-service early childhood educators.

The business environment is a fundamental subject in any Business Studies degree course. This new, student-friendly book divides the subject into the internal and external environment and, where relevant, discusses the interface between the two. It is written with the outward-looking student in mind and, as a result, encourages readers to reflect on what they have read and to consolidate their learning through regular self-testing exercises and discussion points. The text contains highly relevant and 'household name' case studies, ensuring that it is a highly topical and engaging book. Where organisational styles differ, the authors put forward the pros and cons of different points of view, ensuring that students have the information necessary to make up their own minds and develop management strategies of their own.

This timely volume provides an up-to-date and comprehensive summary about what is known about aging and work and addresses the challenges and opportunities confronting older workers and organizations. The authors describe current and emerging topics related to work and aging adults such as working in teams, the increasing diversity of the labor force, work and caregiving, the implications of technology for an aging workforce, and health and wellness issues. The authorship is international; the authors are renowned for their respective work in the topical areas and represent a broad range of disciplines within academia, as well as offer perspectives from government and policy. Jobs, organizations, the labor market, and the workforce are experiencing dramatic change. Workers of all ages, including older workers, need to interact with the wide variety of ubiquitous technologies that are reshaping work processes, job content, work settings, communication strategies, and the delivery of training, and this book aims to update readers on the particular issues facing today's aging adults in the workplace. The chapters' broad and inclusive scope encompasses: Workplace aging and jobs in the 21st century The retirement income security outlook for older workers Population aging, age discrimination, and age discrimination protections Older workers and the contemporary labor market The role of aging, age diversity, and age heterogeneity within teams The intersection of family caregiving and work Current and Emerging Trends in Aging and Work is relevant to a broad audience of academic researchers, practitioners, and students in psychology, sociology, management, engineering (industrial and human factors), the health sciences, gerontology/geriatrics, and public health. It is also a useful resource for government and policy leaders, as well as workers and managers in the public and private sectors.

Psychological Foundations of Marketing considers the impact of psychology on marketing practice and research, and highlights the applied aspects of psychological research in the marketplace. This book presents an introduction to both areas, and provides a survey of the various contributions that psychology has made to the field of marketing. Each chapter considers a key topic within psychology, outlines the main theories, and presents various practical applications of the research.

Psychologists have been fascinated by the world of work, and the changing relationship between people, technology and the workplace, since the onset of the industrial revolution. And in providing a complete and contemporary overview of this evolving and fascinating field, the new edition of Work and Organizational Psychology is the perfect textbook, outlining not only the key theoretical ideas, but also how they relate to the role of psychologists advising today's organizations. The only textbook to integrate the fields of HRM and organizational behaviour, the new edition is thoroughly revised to cover new technological advances such as virtual workplaces and virtual employees. In an era of rapid socio-economic change, there is also expanded coverage of the role of workplace diversity, employee commitment and globalization, as well as updated chapters on key concepts such as motivation, leadership, group behaviour and well-being at work. Also including a chapter on career development, the book is supported by a range of pedagogical features, spotlighting issues of theoretical, ethical or contemporary interest, whilst also enabling students to engage in active learning. Lucid and comprehensive, the second edition of Work and Organizational Psychology will be the cornerstone for any student of this dynamic field.
