In Exhibition-ism, theorist and artist Mieke Bal develops the idea that exhibiting is a significant form of the contemporary.In an exhibition, visitors are in the actual company of artworks that can perform. Looking at art as process, Bal makes the case that the being-together-in-time of an exhibition visit encourages and, if the curation is well thought-out, can heighten the sense of the ...

Assessment of the Beatles artistic achievement providing biographical, musical, and historical detail through a chronology of their songs.

A 1999 overview of historical performance, surveying issues and suggesting future developments.

In recent decades, African states have developed an impressive infrastructure for training their peacekeepers. In addition, peacekeeping, peacebuilding and associated areas of conflict resolution have become significant areas of employment. Marco Jowell has spent a decade working in peacekeeping training in East Africa - initially as one of the foreign 'Technical Advisers' at the Peace Support Operations (PSO) training centre in Kenya, the International Peace Support Training Centre (IPSTC) and subsequently as a strategic adviser to the Rwanda Peace Academy. Using first-hand experience, he considers how military forces from a variety of African states - with great differences in history, language and political systems and with militaries with different cultures and capabilities - can conduct complicated multinational peacekeeping operations. He shows how regional peacekeeping training centres provide an environment for African elites, predominately military, to interact with each other through shared training and experiences. This process of interaction, or socialisation, improves skills but also encourages cohesion so that future African-led missions will be managed by well-trained officers who are comfortable and willing to work within a regional or Pan-African framework. Jowell shows that part of the aim of peacekeeping training centres is to foster a Pan-African 'outward' looking ideology or disposition as well as improving technical ability. This book will be essential reading for all involved with African military and security studies and analysts of peacekeeping training and operations.

We are here on earth not to guard a museum but to cultivate a garden flourishing with life and promised to a glorious future, John XXIII exhorted the Church at the dawn of the Second Vatican Council. In an age when some skeptics suggest that the reformed liturgy has lost the wonder and spiritual depth of previous ages, Standing Together in the Community of God affirms that we need not look back, the Sacred Mysteries are already in our midst. Their wellspring and summit is the heart of God, shared in the Trinity's own communion, announced now as pure Gift. Praising God for God's saving acts in Jesus, as Vatican II reminded us, we encounter Christ's sacramental presence in four modes: in the person of the priest who gathers the community into communion, in the elements and actions of the sacraments, in the word proclaimed and preached, and in the assembly praying and singing (SC #7). In rhythm and harmony, these modes invite us to encounter the multivalent depth of the Mysteries that announce Christ in you, the hope of glory (Col 1.27). Together they proclaim the Risen One among us, the totus Christus, hope for a hungry world, allowing each mode its respect as a bearer of the sacred, these focal words and actions in the liturgy echo a communion song that announces Christ's real presence to us and for us and with us. Beginning deep within, this is a spirituality and piety for the twenty-first century, ever ancient and ever new. Pal A. Janowiak, SJ, has been an associate professor of sacramental and liturgical theology at the School of Theology and Ministry at Seattle University in Seattle, Washington. He now teaches at the Jesuit School of Theology of Santa Clara University in Berkeley, California.

Time, Self, and Psychoanalysis has two theoretical foci: the first is the nature of time experience and the second is the implications of the understanding of time for conceptualizing the nature and functioning of the self. The result is a result is a rethinking of the self-concept and its engagement in the analytic process. The book pragmatically explores patterns of enactment in analysis through three extensive cases in which chronic and significant lateness characterized the analysis.

A cross-cultural volume that investigates the question of how social minorities are formed

First Published in 2002. Routledge is an imprint of Taylor & Francis, an informa company.

This book explores how women's relationship with food has been represented in Italian literature, cinema, scientific writings and other forms of cultural expression from the 19th century to the present. Italian women have often been portrayed cooking and serving meals to others, while denying themselves the pleasure of the table. The collection presents a comprehensive understanding of the symbolic meanings associated with food and of the way these intersect with Italian women's socio-cultural history and the feminist movement. From case studies on Sophia Loren and Elena Ferrante, to analyses of cookbooks by Italian chefs, each chapter examines the unique contribution Italian culture has made to perceiving and portraying women in a specific relation to food, addressing issues of gender, identity and politics of the body.

The extraordinary story of a young man's plunge into the unique and wonderful world of the circus—taking readers deep into circus history and its renaissance as a contemporary art form, and behind the (tented) walls of France's most prestigious circus school. When Duncan Wall visited his first nouveau cirque as a college student in Paris, everything about it—the monochromatic costumes, the acrobat singing Simon and Garfunkel, the juggler reciting Proust—was captivating. Soon he was waiting outside stage doors, eagerly chatting with the stars, and attending circuses two or three nights a week. So great was his enthusiasm that a year later he applied on a whim to the training program at the École Nationale des Arts du Cirque—and was, to his surprise, accepted. Sometimes scary and often funny, The Ordinary Acrobat follows the (occasionally literal) collision of one American novice and a host of gifted international students in a rigorous regimen of tumbling, trapeze, juggling, and clowning. Along the way, Wall introduces readers to all the ambition, beauty, and thrills of the circus's long history: from hardscrabble beginnings to Gilded Age treasures, and from twentieth-century artistic and economic struggles to its brilliant reemergence in the form of contemporary circus (most prominently through Cirque du Soleil). Readers meet figures past—the father of the circus, Philip Astley, the larger-than-life P. T. Barnum—and present, as Wall seeks lessons from innovative masters including juggler Jérôme Thomas and clown André Riot-Sarcey. As Wall learns, not everyone is destined to run away with the circus—but the institution fascinates just the same. Brimming with surprises, outsized personalities, and plenty of charm, The Ordinary Acrobat delivers all the excitement and pleasure of the circus ring itself.
