Designed for providers who work with judicial clients, the Providers Guide presents effective cognitive-behavioral treatment approaches. The Second Edition of this bestseller unveils a state-of-the-art approach for effectively preventing criminal recidivism and substance abuse relapse within community based and correctional settings.

The accompanying Participant/Es Workbook to the SSC is written to engage clients and encourage active participation in treatment and responsible living. Phase I: Challenge to Change: Building Knowledge and Skills for Responsible Living Phase II: Commitment to Change: Strengthening Skills for Self-Improvement, Change, and Responsible Living Phase III: Taking Ownership of Change: Lifestyle Balance and Healthy Living

It's Not Your Fault is a workbook for parents, family, and friends of parents of offenders or at risk (for criminal behavior) youth. Others who would find this workbook very helpful are: university professors and students, criminal justice and juvenile justice professionals, youth workers, and medical professionals who are working with troubled adolescents, juvenile offenders, children at risk of becoming juvenile delinquents, or their parents. After reading this book, you will end the blame game - where parents and professionals spend valuable time trying to figure out who or what to blame for the child's behavior - and instead you will focus on moving forward.Parents are free to drop the guilt and shame that gets in the way of helping their child and their family. This approach requires the delinquent child to take responsibility for his own actions, and avoids the ineffective, misguided tactics of most treatment programs that seek to find reasons why the child has become a juvenile delinquent - sometimes ending in blaming the parents. This workbook borrows heavily from proven cognitive behavioral therapy techniques where children identify and own thinking errors, complete daily logging and review change team behavior ratings. There are assessment components and team-building guidelines as well as compelling advice. Author Cay Shea Hellervik has fifteen years of experience with adolescents who have committed serious crimes. Parents have played a critical role in her successful approach. It's Not Your Fault is the practical guide that one can follow step-by-step to help these troubled children turn their lives around.

'The third in a series explicating the criminal mind, this volume summarizes observations, interpretations, and conclusions derived from a study of 121 criminal men who used drugs and/or alcohol to excess. Originally set in writing by Yochelson before his death in 1976, the materials were edited and updated by Samenow for publication. Systematic, probing and repeated interviews were used as the vehicle for gathering information on common mental themes among men apprehended and sentenced for criminal acts.... Yochelson and Samenow attribute crime to a series of early irresponsible choices that predate drug use among drug-using criminals. Personality and personal choice variables are conceptualized as critical in initialing and maintaining use. In what is called an indiscriminate search for excitement, drug-using criminals are characterized as expanding their criminal repertoire while excusing their actions by rationalizations sometimes invented by sociologists, psychologists, and psychiatrists. Although these ideas are of considerable interest, the real value of the text lies in its intriguing presentation of drug-user thinking. Specifically, three chapters are well worth reading. The description of mental activities associated with such constructs as 'the high,' 'the nod,' and 'the rush' are probably on target for many drug users, whether criminal or not. The chapter explaining drugs as facilitators offers several notions worthy of systematic inquiry, as does the one devoted to principles for encouragement of behavior change. Of perhaps greatest benefit to most readers are caveats regarding management of drug users in what may be seen as a cognitive-behavioral framework. Yochelson and Samenow contend that drug-using criminal men represent the architects of their criminal life-styles and that it is they themselves who can correct irresponsible thoughts and behaviors through application of logic over emotion.' DContemporary Psychology A Jason Arosen Book

Over the past few decades new ways of conceiving the relation between people, practices and institutions have been developed, enabling an understanding of human conduct in complex situations that is distinctive from traditional psychological and sociological conceptions. This distinctiveness is derived from a sophisticated analytic approach to social action which combines conversation analysis with the fresh treatment of epistemology, mind, cognition and personality developed in discursive psychology. This volume is the first to showcase and promote this new method of discursive research in practice. Featuring contributions from a range of international academics, both pioneers in the field and exciting new researchers, this book illustrates an approach to social science issues that cuts across the traditional disciplinary divisions to provide a rich participant-based understanding of action.

Adolescents are a particularly vulnerable patient population in the justice system. Mental health providers can get specific tools for improving evaluation and treatment of at-risk youth with this comprehensive and developmentally appropriate treatment program. About the Participant's Workbook Presents a written and illustrated format designed to help adolescents better understand and reflect on each of the 32 treatment sessions Supplies adolescent clients with a visual and written record of all treatment objectives, content information, modeling and role plays, discussion points, interactive exercises, Encourages journaling with reflective assignments and space to record ideas, insights, short and long term goals, and progress Geared toward a range of reading and conceptual abilities Uses comic strip illustrations and first-person stories to engage adolescents Guides participants through three discrete phases of resiliency and success: Challenge to Change – WHAT? Commitment to Change – HOW? Ownership of Change – NOW!

Attention Deficit/Hyperactivity Disorder (ADHD) in adulthood is a prevalent and impairing disorder. While medications have been effective in treating adult ADHD, the majority of individuals treated with medications still have symptoms that require additional skills and symptom management strategies. This Second Edition of Mastering Your Adult ADHD is thoroughly updated to present the most current, empirically supported treatment strategies in cognitive behavioral therapy (CBT) for coping with symptoms of adult ADHD. The Therapist Guide provides clinicians with effective means of teaching adult clients skills that have been scientifically tested and shown to help them cope with ADHD. The program has been updated to include the optional use of technology and smart phones to improve organization and planning. Core modules cover the development of systems for keeping track of appointments and tasks, reducing distractibility, and improving adaptive thinking skills, and there's an optional module on reducing procrastination. Information is also provided regarding holding an informational meeting with a spouse, partner, or family member. The step-by-step, session-by-session descriptions are a practical resource for therapists who deliver the treatment. The companion Client Workbook contains all of the necessary information for participating in the practical CBT intervention. It includes worksheets, forms, and a link to an assessment measure that can be used to gauge progress during treatment.

This Provider's Guide is an adjunct to the best-selling Criminal Conduct and Substance Abuse Treatment. This text is specifically designed to meet the needs of practitioners working with female substance abusers.

A critical look at the relationship between law and psychology.

This is a client workbook for those in treatment or considering treatment for social anxiety. This program has met the American Psychological Association's Division 12 Task Force criteria for empirically-supported treatments. Clients will learn how social anxiety interferes with the achievement of life goals. The workbook includes information about a variety of interventions, such as exposure, cognitive re-framing, and medication.
