shows how those methods can help us make sense of the present and prepare for the future. Renowned economist Nouriel Roubini electrified his profession and the larger financial community by predicting the current

crisis well in advance of  
anyone else. Unlike most in  
his profession who treat  
economic disasters as  
freakish once-in-a-lifetime  
events without clear cause,  
Roubini, after decades of  
careful research around the

world, realized that they  
were both probable and  
predictable. Armed with an  
unconventional blend of  
historical analysis and  
global economics, Roubini  
has forced politicians,  
policy makers, investors,
