The Second Edition of Ken Guest's Cultural Anthropology: A Toolkit for a Global Age covers the concepts that drive cultural anthropology by showing that now, more than ever, global forces affect local culture and the tools of cultural anthropology are relevant to living in a globalizing world.

Endorsed by Geert Hofstede, this is the only book that explains the relationship between national culture and national differences in crucially important phenomena, such as speed of economic growth, murder rates, and educational achievement in a scientifically rigorous way.

In her new book, distinguished anthropologist June Nash tackles the critical question of how people of diverse cultures confront the common problems that arise with global integration. She reveals these impacts on an urban U.S. community, on Mandalay rice cultivators, as well as on Mayan and Andean peasants and miners. Her decades-long research in these communities provides a valuable resource for anthropologists and other social scientists engaged in contemporary ethnographic research.

Best-selling author Ken Guest presents the essential readings and diverse voices that will help students understand their rapidly globalizing world. This concise, affordable reader is designed to complement any introductory syllabus and is the perfect companion to Guest's market-leading texts.
