This one-of-a-kind resource is written for educational leaders - administrators and teachers - who want to successfully restructure and enhance school curriculum.

This resource shows educators how to establish dynamic curriculum leadership and develop a curriculum that will transform an ordinary school into a school of excellence.

Moving beyond alignment and national boilerplate standards, this book takes the position that curriculum and instruction are inseparable concepts from the institutional point of view, and presents strategies to ensure their congruency. To achieve student success it is imperative that educational leaders have superb knowledge and skills in curriculum and instructional leadership whether they operate from the central office or the building level. Bradley contends that paper and pencil tests to measure student achievement on basic and minimum skills will certainly remain as one criterion of school evaluation. However, the public and the educational community will continue to demand the maximizing of potential for all students as an evaluation component of equal value and importance. The educational leader of today and tomorrow will need the knowledge and skills to facilitate this two-pronged approach to student achievement through curriculum design, development, implementation, and evaluation. Curriculum Leadership has, as its purpose, the preparation of leaders to facilitate this process.

Although traditional curriculum and instructional leadership frameworks have dominated educational administration training for almost thirty years, it has become increasingly clear that even the most recent frameworks have failed today's leaders who struggle with the politics of curriculum decisions on a daily basis. Critical Curriculum Leadership is an examination of curriculum leadership in the wake of U.S. testing mandates and school reforms, all of which seem to support a particular set of conservative ideologies. Drawing from her own longitudinal ethnographic study and from existing literature and research in the field, Ylimaki explores the formation of curriculum leadership in relation to broader cultural and political shifts. She shows how traditional leadership frameworks have come up short, and makes the case for an alternative leadership theory at the intersection of educational leadership and curriculum studies. She provides analytical tools that inspire progressive education and offers critical theories, strategies, research examples, problem-posing cases, and research ideas essential for curriculum leadership in the present conservative era. Critical Curriculum Leadership will appeal to the many educational leadership scholars and practitioners who are interested in developing effective and socially just curricula in their schools and districts as well as curriculum scholars who are interested in leadership issues.
