Former safe-cracking spy, Maggie Silver, likes her new life as a regular high-school girl. Mostly. Okay, so there's the usual cliques, bad lunches and frustratingly simple locker combinations, but there's also her new boyfriend, Jessie, and insanely cool best friend, Roux. So when her parents are falsely accused of a crime, Maggie and her new team flee to Paris where she will have to use all her skills as a spy in order to clear their names. Too bad it only puts her and everyone she loves in danger.

This book provides an extensive introduction to numerical computing from the viewpoint of backward error analysis. The intended audience includes students and researchers in science, engineering and mathematics. The approach taken is somewhat informal owing to the wide variety of backgrounds of the readers, but the central ideas of backward error and sensitivity (conditioning) are systematically emphasized. The book is divided into four parts: Part I

It's Senior Party Week, that magical in-between time after classes have ended but before graduation, chock-full of gimmicky theme parties, last-minute bonding, and family traditions. Olivia couldn't be more ready. Class salutatorian and confident in her future at LSU, she's poised to sail through to the next phase of her life. But when the tiny hiccup of an unsigned off-campus P.E. form puts Olivia in danger of not graduating at all, she has one week to set things straight without tipping off her very big and very nosy extended family. Volunteering to help at a local golf tournament should do it, but since Olivia's mom equipped her phone with a tracking app, there'll be no hiding the fact that she's at the golf course instead of all the graduation parties happening at the same time. Unless, that is, she can convince the Fab Four--her ride-or-die cousins and best friends Sophie, Charlie, and Wes--to trade phones with her as they go through the motions of playing Olivia for the week. Sure, Olivia's sudden ""passion"" for golf is met with some suspicion. And sure, her grasp of the rules is a little shaky. And yes, okay, a very cute, very off-limits boy keeps popping up in her orbit. But she is focused! She has a schedule and a plan! Nothing can possibly go wrong . . . right?
