An annual guide helps solo and small firm lawyers find the best legal technology for their dollar, providing current information and recommendations on computers, servers, networking equipment, legal software, printers, security products, smartphones, and everything else a law office might need. Original.

Computers -- Computer operating systems -- Monitors -- Computer peripherals -- Printers -- Scanners -- Servers -- Server operating systems -- Networking hardware -- Miscellaneous hardware -- Productivity software -- Security software -- Case management -- Billing software -- Litigation programs -- Document management -- Document assembly -- Collaboration -- Remote access -- Mobile security -- More about Macs -- Unified messaging and telecommunications -- Utilities -- The legal implications of social networking -- Paperless or paper LESS -- Tomorrow in legal tech.

This book constitutes selected papers from the lectures given at the workshops held in conjunction with the User Modeling, Adaptation and Personalization Conference, UMAP 2011, Girona, Spain, in July 2011. The 40 papers presented were carefully reviewed and selected for inclusion in this book. For each workshop there is an overview paper summarizing the workshop themes, the accepted contributions and the future research trends. In addition the volume presents a selection of the best poster papers of UMAP 2011. The workshops included are: AST, adaptive support for team collaboration; AUM, augmenting user models with real worlds experiences to enhance personalization and adaptation; DEMRA, decision making and recommendation acceptance issues in recommender systems; PALE, personalization approaches in learning environments; SASWeb, semantic adaptive social web; TRUM, trust, reputation and user modeling; UMADR, user modeling and adaptation for daily routines: providing assistance to people with special and specific needs; UMMS, user models for motivational systems: the affective and the rational routes to persuasion.

Covers receipts and expenditures of appropriations and other funds.

This book examines the rehabilitation of language disorders in adults, presenting new research, as well as expert insights and perspectives, into this area. The first chapter presents a study on personalised cueing to enhance word finding. Cynthia K. Thompson and her colleagues contribute a chapter describing The Northwestern Naming Battery and its use in examining for verb and noun deficits in stroke-induced and primary progressive aphasia. Heather Harris-Wright and Gilson J. Capilouto examine a multi-level approach to understanding the maintenance of global coherence in aphasia. Kathryn M. Yorkston and colleagues provide discussion on the training of healthcare professionals, and what speech and language pathology and medical education can learn from one another. Yorkston also presents a systematic review asking whether principles of motor learning can enhance retention and transfer of speech skills. Connie A. Tompkins present a single-participant experiment examining generalization of a novel treatment for coarse coding deficit in right hemisphere damage. Finally, Chris Code returns to the topic of apportioning time for aphasia treatment. This book was originally published as a special issue of Aphasiology.

A Practical Guide to Computer Forensics Investigations introduces the newest technologies along with detailed information on how the evidence contained on these devices should be analyzed. Packed with practical, hands-on activities, students will learn unique subjects from chapters including Mac Forensics, Mobile Forensics, Cyberbullying, and Child Endangerment. This well-developed book will prepare students for the rapidly-growing field of computer forensics for a career with law enforcement, accounting firms, banks and credit card companies, private investigation companies, or government agencies.

This is the first book to discuss the sustainable development of digital scholarly information in three key aspects: economic, social and environmental sustainability. Taking as its starting point the premise that digital information systems and services form the backbone of a knowledge society and digital economy, this book explores the challenges of ensuring sustainability of information in an evolving digital world. Author Gobinda Chowdhury attempts to find answers to five key questions in the context of scholarly information systems and services: How sustainable are today's information systems and services? How can we ensure the sustainability of information throughout its lifetime? Can today's information systems and services face the new economic challenges while providing easy and equitable access to information for everyone? Can the level and quality of information services be sustained over a long period of time? Can all these activities be performed in an environment-friendly manner? Chowdhury takes the approach of a research monograph based on literature review and meta-analysis of the issues and challenges associated with the various forms of sustainability of digital information systems and services. He proposes new models for study and research based on the critical analysis of developments in related areas. Illustrated with case studies and informed by the latest research, the chapters cover: - Economic sustainability of information - Environmental sustainability of information - Social sustainability of information - Sustainability of digital libraries and information services - Emerging issues and policies - Sustainability of information models - Research issues and challenges. Readership: This cutting-edge text is a must-read for those involved in setting policy and direction for information institutions, digital library managers and developers, researchers and students on LIS and digital information courses.

This book provides an overview of various challenges and contemporary research activities in cultural heritage information focusing particularly on the cultural heritage content types, their characteristic and digitization challenges; cultural heritage content organization and access issues; users and usability as well as various policy and sustainability issues associated with digital cultural heritage information systems and services. Cultural Heritage Information, the first book in the peer-reviewed i-Research series, contains eleven chapters that have been contributed by seventeen leading academics from six countries. The book begins with an introductory chapter that provides a brief overview of the topic of digital cultural heritage information with the subsequent chapters addressing specific issues and research activities in this topic. The ordering of the chapters moves from scene setting on policies and infrastructures, through considerations of interaction, access and objects, through to concrete system implementations. The book concludes by looking forward to issues around sustainability, in the widest sense, that are necessary to think about in order to maximize the availability and longevity of our digital cultural heritage. The key topics covered are: - Managing digital cultural heritage information - Digital humanities and digital cultural heritage (alt-history and future directions) - Management of cultural heritage information: policies and practices - Cultural heritage information: artefacts and digitization technologies - Metadata in cultural contexts | from manga to digital archives in linked open data environment - Managing cultural heritage: information systems architecture - Cultural heritage information users and usability - A framework for classifying and comparing interactions in cultural heritage information systems - Semantic access and exploration in cultural heritage digital libraries - Supporting exploration and use of digital cultural heritage materials: the PATHS perspective - Cultural heritage information services: sustainability issues. Readership: This will be essential reading for researchers in Information Science specifically in the areas of digital libraries, digital humanities and digital culture. It will also be useful for practitioners and students in these areas who want to know the different research issues and challenges and learn how they have been handled in course of various research projects in these areas.
