Democracy and Enlargement in Post-Communist Europe presents the principal findings of a unique in-depth study of the birth of democracy and the market economy in fifteen post-Communist countries. Haerpfer analyses and compares the information collected by the New Democracies Barometer public opinion surveys to provide an overview of the process of democratization across Central and Eastern Europe. This is an extremely valuable resource and will be useful for all those interested in the European Union, comparative politics and democracy and the Communist legacy. It contains data from Belarus, Bulgaria, Croatia, the Czech Republic, Estonia, the Federal Republic of Yugoslavia, Hungary, Latvia, Lithuania, Poland, Romania the Russian Federation, Slovakia, Slovenia and Ukraine.

The collapse of Communism has created the opportunity for democracy to spread from Prague to the Baltic and Black Seas. But the alternatives—dictatorship or totalitarian rule—are more in keeping with the traditions of Central Europe. And for many post-Communist societies, democracy has come to be associated with inflation, unemployment, crime, and corruption. Is it still true, then, as Winston Churchill suggested a half-century ago, that people will accept democracy with all its faults—because it is better than anything else? To find out, political scientists Richard Rose, William Mishler, and Christian Haerpfer examine evidence from post-Communist societies in eastern Europe. Drawing on data from public opinion and exit polls, election results, and interviews, the authors present testable hypotheses regarding regime change, consolidation, and prospects for stabilization. The authors point out that the abrupt transition to democracy in post-Communist countries is normal; gradual evolution in the Anglo-American way is the exception to the rule. While most recent books on democratization focus on Latin America and, to some extent, Asia, the present volume offers a unique look at the process currently under way in nine eastern European countries: the Czech Republic, Hungary, Slovakia, Poland, Slovenia, Bulgaria, Romania, Belarus, and Ukraine. Despite the many problems these post-Communist societies are experiencing in making the transition to a more open and democratic polity, the authors conclude that a little democracy is better than no democracy at all.

Many fear that democracies are suffering from a legitimacy crisis. This book focuses on 'democratic deficits', reflecting how far the perceived democratic performance of any state

diverges from public expectations. Pippa Norris examines the symptoms by comparing system support in more than fifty societies worldwide, challenging the pervasive claim that most established democracies have experienced a steadily rising tide of political disaffection during the third-wave era. The book diagnoses the reasons behind the democratic deficit, including demand (rising public aspirations for democracy), information (negative news about government) and supply (the performance and structure of democratic regimes). Finally, Norris examines the consequences for active citizenship, for governance and, ultimately, for democratization. This book provides fresh insights into major issues at the heart of comparative politics, public opinion, political culture, political behavior, democratic governance, political psychology, political communications, public policymaking, comparative sociology, cross-national survey analysis and the dynamics of the democratization process.

What is the relationship between democracy and political culture in countries undergoing major systemic change? Have subjective political orientations of citizens been important in shaping the development of democracy in central and eastern Europe after the fall of communism? These core questions are tackled by an impressive range of twenty political scientists, sixteen of which are based in the central and eastern European countries covered in this essential new book. Their analyses draw on a unique set of data collected and processed by the contributors to this volume within the framework of the World Values Survey project. This data enables these authors to establish similarities and differences in support of democracy between a large number of countries with different cultural and structural conditions as well as historical legacies. The macro-level findings of the book tend to support the proposition that support of democracy declines the further east one goes. In contrast, micro-level relationships have been found to be astonishingly similar. For example, support of democracy is always positively related to higher levels of education – no matter where an individual citizen happens to live. This new book builds a clear understanding of what makes democracies strong and resistant to autocratic temptation.

Designed for an undergraduate course in international law, the text may also supplement International Relations, Foreign Policy, International Affairs, World Politics, and Comparative Law courses. A mix of commentary, edited cases, and problems are included. Revisions include three new chapters: International Organizations (Ch. 3), Individuals and Corporations (Ch. 4), and International Environment (Ch. 12). Career Opportunities in International Law is the new Appendix 3. Exhibits graphically illustrating chapter concepts have been added as well as expanded coverage of Sources (Ch. 1), Dispute Resolutions (Ch. 9), and International Business (Ch. 3).

Belarus is unique among the states of the former Soviet bloc, in that after a decade of transition', the country remains stalled' and backward-oriented. Political and economic changes are characterised by half-measures, and recently a new suppression of dissent has been introduced; the country balances between the prospect of democracy and a retreat to authoritarianism. These developments contrast starkly with the many democratic changes in neighbouring states and suggest a possible alternative path for future development in Eastern Europe. This book provides a thorough overview of current developments in Belarus. It looks at historical, political, economic and social changes, and at international relations, especially relations with Russia and the European Union, considering all these factors both in their domestic and international contexts and defines the type of democracy, if any, which exists in Belarus, exploring the prospects for further democratisation.

This book presents a comprehensive theory of why human freedom gave way to increasing oppression since the invention of states - and why this trend began to reverse itself more recently, leading to a rapid expansion of universal freedoms and democracy. Drawing on a massive body of evidence, the author tests various explanations of the rise of freedom, providing convincing support of a well-reasoned theory of emancipation. The study demonstrates multiple trends toward human empowerment, which converge to give people control over their lives. Most important among these trends is the spread of 'emancipative values', which emphasize free choice and equal opportunities. The author identifies the desire for emancipation as the origin of the human empowerment trend and shows when and why this desire grows strong; why it is the source of democracy; and how it vitalizes civil society, feeds humanitarian norms, enhances happiness, and helps redirect modern civilization toward sustainable development.
