Most people know that there are 70 million Baby Boomers in America today....but what is less known is that there are approximately 100 million people in America between the ages of 16 and 30. This generation has just entered, or will soon be entering the work force. And they have no idea how to invest, save, or handle their money. Young people today come out of school having had little or no formal education on the basics of money management. Many have large debts from student loans looming over their heads. And many feel confused and powerless when their pricey educations don't translate into high paying jobs. They feel that their \$30,000-\$40,000 salary is too meager to bother with investing, and they constantly fear that there will be "too much month left at the end of their money." Douglas R. Andrew has shown the parents of this generation a different pathway to financial freedom. Now Doug and his sons, Emron and Aaron - both of whom are in their mid-20s - show the under-30 crowd how they can break from traditional 401k investment plans and instead can find a better way by investing in real estate, budgeting effectively, avoiding unnecessary taxes and using life insurance to create tax-free income. With the principles outlined in Millionaire by Thirty, recent graduates will be earning enough interest on their savings to meet their basic living expenses by the time they're 30. And by the time they're 35, their investments will be earning more money than they are, guaranteeing them a happy, wealthy future.

This unique resource delivers complete, easy-to-understand coverage of the management of complex technical projects through systems engineering. In his own time Edward IV was seen as an able and successful king who rescued England from the miseries of civil war and provided the country with firm, judicious, and popular government. The prejudices of later historians diminished this high reputation, until recent research confirmed Edward as a ruler of substantial achievement, whose methods and policies formed the foundation of early Tudor government. This classic study by Charles Ross places the reign firmly in the context of late medieval power politics, analyzing the methods by which a usurper sought to retain his throne and reassert the power of a monarchy seriously weakened by the feeble rule of Henry VI. Edward's relations with the politically active classes—the merchants, gentry, and nobility—form a major theme, and against this background Ross provides an evaluation of the many innovations in government on which the king's achievement rests.
