This is the perfect book to help your little one learn their essential first words. On the big, sturdy board pages, they'll discover bright, bold photographs of all kinds of things they'll recognise from around the home and their everyday experiences, all grouped into clear sections such as toys, clothes, mealtime and more. Each picture has its name written underneath, helping children to build key early vocabulary and start to develop word and picture association. A must-have for every first library!

"This book is about how metalsmiths and jewelers can take advantage of the intrinsic characteristics of metal, understood since antiquity, and employ a mechanical device known for nearly 200 years to make objects by hand. Die forming, as described here, does not restrict or replace hand work. In fact, the die-forming process requires additional skill and knowledge in the making of dies, and in controlling their use in the press. Die forming extends the possibilities of what one can make and opens new avenues of exploration. It is a continuation of the tradition of innovation in craft." --introduction.

The comic book universe is adventurous, mystifying, and filled with heroes, villains, and cosplaying Comic-Con attendees. This book by one of Wired magazine's art directors traverses the graphic world through a collection of pie charts, bar graphs, timelines, scatter plots, and more. Super Graphic offers readers a unique look at the intricate and sometimes contradictory storylines that weave their way through comic books, and shares advice for navigating the pages of some of the most popular, longest-running, and best-loved comics and graphic novels out there. From a colorful breakdown of the DC Comics reader demographic to a witty Venn diagram of superhero comic tropes and a Chris Ware sadness scale, this book charts the most arbitrary and monumental characters, moments, and equipment of the wide world of comics. Plus, this is the fixed format version, which includes high-resolution images.

After her nightmarish recovery from a serious car accident, Faye gets horrible news from her doctor, and it hits her hard like a rock: she can't bear children. "A major talent" (George R. R. Martin), Ian Tregillis presents a thrilling science fiction World War II adventure trilogy featuring British spies and warlocks working to defeat Hitler's ubermensch...and one mad seer who would destroy timelines and most of humanity to save herself. The Milkweed Triptych discounted ebundle includes: Bitter Seeds, The Coldest War, Necessary Evil Bitter Seeds: It's 1939. The Nazis have supermen, the British have demons, and one perfectly normal man gets caught in between. Raybould Marsh is a British secret agent in the early days of the WWII, haunted by something strange he saw on a mission during the Spanish Civil War: a German woman with wires going into her head who looked at him as if she knew him. The Coldest War: Warlocks and spies contend in a very different Cold War. As former spy Raybould Marsh strives to defend Queen and country, he must confront his nation's darkest secrets from World War 2 in this direct sequel to Bitter Seeds. Necessary Evil: Raybould Marsh, one of "our" Britain's best spies, has travelled to another Earth in a desperate attempt to save at least one timeline from the Cthulhu-like monsters who have been observing our species from space and have already destroyed Marsh's timeline, in this stunning conclusion to the series. Why businesses should never underestimate the power of place. Today's business leaders are so obsessed with all things global and virtual that they risk neglecting the critical impact of physical place. It's a paradox of the Internet age: now that it's possible for businesses to be everywhere at once, they need to focus on what it means to be one specific place at a time. The best global brands, from IBM to McDonald's, are by design also the leading local brands. For instance, your decision to patronize Starbucks will depend on whether it's the best local coffee shop in your neighborhood, not on how many thousands of global locations it has. Marketing experts John Quelch and Katherine Jocz offer a new way to think about place in every strategic decision-from how to leverage consumer associations with locations to where to position products on the shelf. They explore case studies such as Nike and The Apple Store, which use place in creative ways. Drawing on a blend of hard data and engaging anecdotes, this book will help any business-from global mega-brands to boutique, small town stores- influence customers more effectively.

CD-ROM contains full text for all the procedures available in the manual. Files are provided both as fully formatted Word 6.0 (.doc) documents and as text-only documents (.txt).
