About Doctor for Friend and Foe. Rick Jolly was the Senior Medical Officer in the Falklands, setting up and running the field hospital at Ajax Bay, where he and his Royal Marine and Parachute Regiment medical teams treated a total of 580 casualties, of which only 3 died of wounds. The building itself was a derelict meat-packing factory, hastily converted to treat incoming wounded – both British and Argentine – even though two unexploded bombs lay at the back of the building.

Rick Jolly was the Senior Medical Officer in the Falklands, setting up and running the field hospital at Ajax Bay, where he and his Royal Marine and Parachute Regiment medical teams treated a total of 580 casualties, of which only 3 died of wounds. The building itself was a derelict meat-packing factory, hastily converted to treat incoming wounded – both British and Argentine – even though two unexploded bombs lay at the back of the building. Rick's diary of the campaign and its aftermath is a fast-paced and gripping account of war experience that covers the entire conflict from initial preparations and passage to the South Atlantic on the requisitioned liner Canberra to daily action reports, and observations and interaction with the key players of the conflict – Col. H. Jones, Brian Hanrahan, Julian Thompson and Max Hastings. Incredible human stories abound, as Rick, a trained commando, dangles from the rescue winch of a Sea King helicopter, saving lives on a daily basis. Yet he also confronts death in a thoughtful, reflective and considered way, helping others to deal with the trauma of war. Now revised and brought fully up to date, this book is a unique first-hand narrative of a conflict that inspired individual and collective heroism among British armed forces, inspiring great pride in 'our boys' by the public back at home, but which also provoked – and continues to provoke – fierce debate.

A new adventure featuring the Thirteenth Doctor as played by Jodie Whittaker

The long-running BBC science fiction program Doctor Who has garnered an intense and extremely loyal fan base since its 1963 debut. This work examines the influences of psychology, literature, pop culture, and the social sciences on Doctor Who storylines and characters. Topics explored include how such issues as class, gender, and sexual attraction factor into the relationships between the Doctor and his companions; whether the Doctor suffers from multiple personality disorder or other psychological afflictions; and the role of the Doctor's

native culture in shaping his sense of identity.

The Doctor takes the road less travelled... where danger and death lie in wait. The Tenth Doctor battles a horrific corporate weapon on a spaceship full of ghosts. The Eleventh Doctor uncovers a steam-powered robot conspiracy in Victorian-era San Francisco. And the Twelfth Doctor and Bill face chaos on the streets of London, as a creative power runs amok. Writer James Peaty ('2000AD', 'Supergirl') and artists Iolanda Zanfardino, Pasquale Qualano, and Brian Williamson conjure three gripping new tales from the Doctor's life, all expertly colored by Diijo Lima. And the road leads directly to the all-new Thirteenth Doctor series, as the Thirteenth Doctor creative team of writer Jody Houser ('Faith', 'Mother Panic', 'Stranger Things'), artist Rachael Stott, and colorist Enrica Eren Angiolini deliver a series of short stories that introduce an all-new friend... of foe. Who is trying to reach the Doctor – and how can they be saved? "A wonderful little story." – Sci Fi Pulse "A fun adventure." – Pop Culture Uncovered "Lithe and energetic artwork, a fast-paced and accessible script – a path well worth taking." – Newsarama Collects Doctor Who: The Road to the Thirteenth Doctor #1-3 p.p1 {margin: 0.0px 0.0px 0.0px 0.0px; font: 12.0px Calibri} p.p2 {margin: 0.0px 0.0px 0.0px 0.0px; font: 12.0px Calibri; min-height: 14.0px}

As asymmetric 'wars among the people' replace state-on-state wars in modern armed conflict, the growing role of military medicine and medical technology in contemporary war fighting has brought an urgent need to critically reassess the theory and practice of military medical ethics. *Military Medical Ethics for the 21st Century* is the first full length, broad-based treatment of this important subject. Written by an international team of practitioners and academics, this book provides interdisciplinary insights into the major issues facing military-medical decision makers and critically examines the tensions and dilemmas inherent in the military and medical professions. In this book the authors explore the practice of battlefield bioethics, medical neutrality and treatment of the wounded, enhancement technologies for war fighters, the potential risks of dual-use biotechnologies, patient rights for active duty personnel, military medical research and military medical ethics education in the 21st Century.

Dr. Norris is a fearless man in more ways than one. We have known men who seemed to have any amount of moral courage, who were physical cowards; and we have known men abundantly endowed with physical courage, who were moral cowards. But Dr. Norris is afraid of nothing, either in the physical or moral realms. Who but Dr. Norris would have dared even to attempt what, by the blessing of God, he has achieved in Detroit? Even the most daring of other men would have been afraid to try. It was this Editor's privilege and honour years ago to enjoy the warm personal friendship of the late Russell H. Conwell, in many respects, in his day, the world's greatest lecturer. We never heard Dr. Conwell lecture without feeling at the end that nothing was impossible. We have the same feeling when we read this record of the achievements of Dr. Norris. It gives us a feeling that there is no enemy physical or moral that may not be defeated and utterly routed; nor any task in our Lord's service which may not be accomplished. Dr. Norris has been subject to trials that were no easier to endure than those of Job, but he has triumphed over them all. In Fort Worth, twice his great church was reduced to ashes – each time to rise from the ashes greater than ever. Some people in this northern part of the Continent would be inclined to say, "Yes, of course; but that was in Fort Worth. And Dr. Norris is a Baptist, and Baptists grow in the Southern states almost without cultivation. Notwithstanding their orthodoxy, they seem to

be rather indigenous to the soil.” It is a fact that Baptists are perhaps the largest body of Christians in the South, and we think it is probably true that Baptist churches do multiply more rapidly in the South than in the North—that is, of course, under the ministry of ordinary men. But that explanation of the First Baptist Church, Fort Worth, will no longer hold. For what about Detroit? Can anyone find a more difficult city on the American Continent in which to do Christian work than Detroit? It may not be more difficult than Chicago or New York, but certainly the difficulties are at least as great. And yet in the short space of three years the Temple Baptist Church of Detroit has outgrown all its buildings, and like Abraham, has dwelt “in tabernacles, with Isaac and Jacob, the heirs with him of the same promise.” The story of these marvelous achievements must prove an inspiration and tonic to the faith of every true believer; and what is equally important, it will provide a spur to the Christian effort of all who read it. Could we afford it, we would place a copy of this book in the hands of every minister of every denomination on this Continent. It should prove equally valuable to deacons and elders, and church officers of every name and rank in all churches; and we question whether any book outside the Bible was ever published so full of inspiration and suggestion and explicit direction to Sunday School workers as this latest book by Dr. Norris. Dr. W.B. Riley

THE STORY: A young English couple on their honeymoon, a German scientist, a French munitions magnate, the inscrutable Irene, and the vulgar but lovable American Harry Van are thrown together in a small winter resort in the Alps. For a short time th

For the first time, a book considers the doctor/patient relationship in the long period and from a broad geographical perspective. Historians, anthropologists and doctors reflect on the factors that, from the Classical age until the present, have altered the care relationship and the power relations embedded within it. The book also highlights that communication and narration, understood as constitutive aspects of care, are the elements which link the past to the present. From the encounter between religion and medicine to the centuries-long struggle between doctors and patients in defence of their respective positions, from medical dramas to efforts to humanize medicine, the book describes the doctor/patient relationship in all its cultural, transnational and transtemporal dimensions.
