The Routledge Companion to Screen Music and Sound provides a detailed and comprehensive overview of screen music and sound studies, addressing the ways in which music and sound interact with forms of narrative media such as television, videogames, and film. The inclusive framework of "screen music and sound" allows readers to explore the intersections and connections between various types of media and music and sound, reflecting the current state of scholarship and the future of the field. A diverse range of international scholars have contributed an impressive set of forty-six chapters that move from foundational knowledge to cutting edge topics that highlight new key areas. The companion is thematically organized into five cohesive areas of study: Issues in the Study of Screen Music and Sound—discusses the essential topics of the discipline Historical Approaches—examines periods of historical change or transition Production and Process—focuses on issues of collaboration, institutional politics, and the impact of technology and industrial practices Cultural and Aesthetic Perspectives—contextualizes an aesthetic approach within a wider framework of cultural knowledge Analyses and Methodologies—explores potential methodologies for interrogating screen music and sound Covering a wide range of topic areas drawn from musicology, sound studies, and media studies, The Routledge Companion to Screen Music and Sound provides researchers and students with an effective overview of music's role in narrative media, as well as new methodological and aesthetic insights.

This book guides nonfiction storytellers in the art of creatively and strategically using sound to engage their audience and bring stories to life. Sound is half of film and video storytelling, and yet its importance is often overlooked until a post-production emergency arises. Written by two experienced creators—one a seasoned nonfiction producer/director with a background in music, and one a sound designer who owns a well-regarded mix studio—this book teaches nonfiction producers, filmmakers, and branded content creators how to reimagine their storytelling by improving sound workflow from field to post. In addition to real-world examples from the authors' own experiences, interviews with and examples from industry professionals across many genres of nonfiction production are included throughout. Written in a conversational style, the book pinpoints practical topics and considerations like 360 video and viewer accessibility. As such, it is a vital point of reference for all nonfiction filmmakers, directors, and producers, or anyone wanting to learn how to improve their storytelling. An accompanying Companion Website offers listening exercises, production sound layout diagrams, templates, and other resources.
