Metaphysics, almost entirely neglected by experimental philosophers, is the central focus of Experimental Metaphysics. The volume brings together a range of views aimed at addressing the question of how cognitive science might be relevant to metaphysics. With contributions from cognitive scientists and philosophers, chapters focus on theoretical and empirical issues involving the potential role of cognitive science in metaphysics. Alongside topics such as free will, objects and causation, in which relevant empirical evidence is discussed and connected to relevant metaphysical issues, more programmatic papers explore theoretical issues centered on the connection between cognitive science and metaphysics. This balanced approach exposes metaphysicians to philosophically relevant work in cognitive science, while showing cognitive scientists the ways in which their work might be important for philosophers. Presenting cutting-edge empirical and theoretical research, Experimental Metaphysics pushes forward the discussion and encourages further engagement with issues at the intersection of cognitive science and metaphysics.

The teachings we have come to know as "traditional Yoga" in the west are, surprisingly, the result of a process of radical transformation, or even of mystification, carried out in the relatively recent past. It spanned back at most 130 years and was influenced heavily by the historical, political and cultural upheavals that led to the birth of modern India. During the research that has led to this publication, we came to understand more and more that it was necessary to place yoga in the broader context in which it had been born and evolved. Comparing the information already at hand, i.e., the one contained in the most credited yoga texts and the one transmitted by our teachers, we then began to confront ourselves with documentary and iconographic sources: Indian, Islamic, Greek, Tibetan, Chinese...Inexplicable inconsistencies and bizarre coincidences surfaced. A completely different history of yoga began to emerge behind the veil of myths, beliefs and assumptions we were taught, a "secret" history hidden in plain sight that certainly did not speak of an unchangeable "traditional" antiquity, or about philosophies and practices untouched by the ideas of the west.
