This selection of over five hundred letters gives us the life of John Cage with all the intelligence, wit, and inventiveness that made him such an important and groundbreaking composer and performer. The missives range from lengthy reports of his early trips to Europe in the 1930s through his years with the dancer Merce Cunningham, and shed new light on his growing eminence as an iconic performance artist of the American avant-garde. Cage ' s joie de vivre resounds in these letters—fully annotated throughout—in every phase of his career, and includes correspondence with Peter Yates, David Tudor, and Pierre Boulez, among others. Above all, they reveal his passionate interest in people, ideas, and the arts. The voice is one we recognize from his writings: singular, profound, irreverent, and funny. Not only will readers take pleasure in Cage ' s correspondence with and commentary about the people and events of a momentous and transformative time in the arts, they will also share in his meditations on the very nature of art. A deep pleasure to read, this volume presents an extraordinary portrait of a complex, brilliant man who challenged and changed the artistic currents of the twentieth century.

Does mental disorder cause crime? Does crime cause mental disorder? And if either of these could be proved to be true what consequences should stem for those who find themselves deemed mentally disordered offenders? Mental Health and Crime examines the nature of the relationship between mental disorder and crime. It concludes that the broad definition of what is an all too common human condition – mental disorder – and the widespread occurrence of an equally all too common human behaviour – that of offending – would make unlikely any definitive or easy answer to such questions. For those who offend in the context of mental disorder, many aspects of the criminal justice process, and of the disposals that follow, are adapted to take account of a relationship between mental disorder and crime. But if the very relationship is questionable, is the way in which we deal with such offenders discriminatory? Or is it perhaps to their benefit to be thought of as less responsible for their offending than fully culpable offenders? The book thus explores not only the nature of the relationship, but also the human rights and legal issues arising. It also looks at some of the permutations in the therapeutic process that can ensue when those with mental health problems are treated in the context of their offending behaviour.
