problem-solving
aptitude in physics. It
also guides the
students on the ways
of approaching a
problem and getting
its solution. The book
also raises the level of
learning of physics by
practicing problem-
solving. It will be
especially useful to
those who have
studied general

This book reflects more than three decades of research on Cellular Automata (CA), and nearly a

Acces PDF

Dutta Pal

decade of work on the application of CA to model biological strings, which forms the foundation of 'A New Kind of Computational Biology' pioneered by the start-up, CARLBio. After a brief introduction on Cellular Automata (CA) theory and functional biology, it

Acces PDF

Dutta Pal

reports on the modeling of basic biological strings with CA, starting with the basic nucleotides leading to codon and anti-codon CA models. It derives a more involved CA model of DNA, RNA, the entire translation process for amino acid formation and the evolution of

Acces PDF

Dutta Pal

protein to its unique structure and function. In subsequent chapters the interaction of Proteins with other bio-molecules is also modeled. The only prior knowledge assumed necessary is an undergraduate knowledge of computer programming and

Acces PDF

Dutta Pal

biology. The book adopts a hands-on, “do-it-yourself” approach to enable readers to apply the method provided to derive the CA rules and comprehend how these are related to the physical ‘rules’ observed in biology. In a single framework, the authors have

Dutta Pal

presented two
branches of science
– Computation and
Biology. Instead of
rigorous molecular
dynamics modeling,
which the authors
describe as a Bottoms-
Up model, or relying
on the Top-Down new
age Artificial
Intelligence (AI) and
Machine Language
(ML) that depends on

Dutta Pal

extensive availability of quality data, this book takes the best from both the Top-Down and Bottoms-up approaches and establishes how the behavior of complex molecules is represented in CA. The CA rules are derived from the basic knowledge of molecular interaction

known results to
derive and predict
results. This book is
