A lively, inviting account of the history of economics, told through events from ancient to modern times and the ideas of great thinkers in the field What causes poverty? Are

economic crises inevitable under capitalism? Is government intervention in an economy a helpful approach or a disastrous idea? The answers to such basic economic questions matter to everyone, yet the unfamiliar jargon and math of economics can seem daunting. This clear, accessible, and even humorous book is ideal for young readers new to economics and for all readers who seek a better understanding of the full sweep of economic history and ideas. Economic historian Niall Kishtainy organizes short, chronological chapters that center on big ideas and events. He recounts the contributions of key thinkers including Adam Smith, David Ricardo, Karl Marx, John Maynard Keynes, and others, while examining topics ranging from the invention of money and the rise of agrarianism to the Great Depression, entrepreneurship, environmental destruction, inequality, and behavioral economics. The result is a uniquely enjoyable volume that succeeds in illuminating the economic ideas and forces that shape our world.

All your complicated economic questions and theories explained by world experts. Economics is a broad topic and if you're not an economist by profession, your knowledge might be limited - until now! The Economics Book is your jargon-free, visual guide to understanding the production and distribution of wealth. To what extent is memory based on mood? Why do we compare ourselves to others? Are there different types of intelligence? How do we change with age? This book answers all these questions and many more in 200 short and accessible essays. From Pavlov's dogs to experimental ethics and from the development of personality to cognitive behavioural therapy, this book will take you from the foundations of psychological thought to modern-day applications, drawing on recent research and established theories. Each essay is accompanied by an illustration or diagram to help unravel complex ideas. The principles of psychology apply to each and every one of us as they shed light on everything from our childhood development to our interaction with others - and Psychology in Minutes is the perfect insight to this fascinating subject. Contents include: Behaviourism, Experimental ethics, Problem solving, Illusions and paradoxes, Dream analysis, Management and leadership, Compliance and conformity, Attitudes and prejudices, Attraction, Moral development, Gender development, The big five personality traits, Classification of mental disorders, Criticisms of psychoanalysis, Positive psychology, Advertising and the media and The working environment.

What happened to the Roman Empire? Why was the Magna Carta so important? What led to the First World War? Why did the USSR collapse? World History in Minutes provides succinct answers to these questions - and many more - in 200 simple and accessible essays. From the 100 Years War to the Gulf Wars, and from the wisdom of Aristotle to the Civil Rights movement, this book distils the major events in human history into easily digestible chunks. Each essay is accompanied by an image - or a clear diagram to illustrate complex ideas - and will plug the gaps in your knowledge of the most important eras, movements and events in the history of humankind. World History in Minutes is the perfect introduction to this expansive subject. Contents include: Neanderthals, Babylonians, Attila the Hun, Abyssinian Empire, Magna Carta, Black Death, Inca, Henry VIII Reformation, Ulster Plantations, Rousseau and the Enlightenment, Declaration of Independence, French Revolution, Tonga Civil War, Universal Suffrage, Spanish Influenza, Great Depression, Pearl Harbour, The Space Age, Civil Rights, Environmentalism, Oligarchs and Tiger Economies.

A very clear, reliable and readable history of economic thought from the ancient world to the present day. From Homer to Marx to John Stuart Mill, Backhouse shows how to keep your Keynesians from your post-Keynesians and New Keynesians. A core book.

Physics in Minutes covers everything you need to know about physics, condensed into 200 key topics. Each idea is explained in clear, accessible language, building from the basics, such as mechanics, waves, and particles, to more complex topics, including neutrinos, string theory, and dark matter. Following the latest scientific research proving that the brain best absorbs information visually, each description is accompanied by an illustration to aid quick comprehension and easy recollection. This convenient and compact reference book is ideal for anyone interested in how our world works. Chapters include: Newton's Laws of Motion, Schrodinger's cat, Magnetism, Superconductivity, Fission and fusion, Higgs Boson, Entropy, Dark matter.

Quantum physics is the most fundamental -- but also the most baffling -- branch of science. Allowing for dead-and-alive cats, teleportation, antimatter, and parallel universes, as well as underpinning all of our digital technology, it's as important as it is mind-bending. This clear and compact book demystifies the strange and beautiful quantum world, and hence the nature of reality itself. Contents include: Schrodinger's cat, inside the atom, the particle zoo, the Higgs boson, Heisenberg's uncertainty principle, God playing dice, relativity, the Big Bang, dark energy and matter, black holes, the fate of the Universe, the Theory of Everything, quantum gravity, string theory, the multiverse, instant communication, quantum computing and cryptography, superconductivity, quantum biology, quantum consciousness, and much more. Written as a series of mini essays with 200 simple diagrams to help understanding, there can be no easier guide to this notoriously confusing subject. At last it's possible for non-specialists to understand quantum theory and its central role in the birth of the universe and the very existence of life.

Both simple and accessible, Science in Seconds is a visually led introduction to 200 key scientific ideas. Each concept is incredibly quick and easy to remember, described by means of an easy-to-understand picture and a maximum 200-word explanation. Concepts span all of the key scientific disciplines including Physics, Chemistry, Biology, Ecology, Biotechnology, Anatomy and Physiology, Medicine, Earth Science, Energy Generation, Astronomy, Spaceflight and Information Technology.
