them to significantly reduce poverty during the past two decades.

However, the performance of the region would have been better if the high tariff and non-tariff barriers issues could have been addressed, with the non-tariff trade cost alone accounts for at least 90% of overall trade costs. With some of the

investment, affecting in particular the opportunities for small and medium-sized enterprises (SMEs) to directly participate in international trade.

Removal of those barriers and deepening regional connectivity can therefore be a strong driver of growth and poverty reduction.

While sufficient
