The radically altered situation today in religion, politics, and global communication-what can broadly be characterized as postmodern and postcolonial-necessitates close rereading of Christianity's classical sources, especially its theologians. In this groundbreaking textbook anthology, twenty-nine distinguished scholars scrutinize the relationship between empire and Christianity from Paul to the liberation theologians of our time. The contributors discuss how the classical theologians in different historical periods dealt with their own contexts of empire and issues such as center and margin, divine power and social domination, war and violence, gender hierarchy, and displacement and diaspora. Each chapter provides insights and resources drawn from the classical theological tradition to address the current political situation. Book jacket.

What has Alexander the Great to do with Jesus Christ? Or the legendary king's conquest of the Persian Empire (335-23 BCE) to do with the prophecies of the Old Testament? In many ways, the early Christian writings on Alexander and his legacy provide a lens through which it is possible to view the shaping of the literature and thought of the early church in the Greek East and the Latin West. This book articulates that fascinating discourse for the first time by focusing on the early Christian use of Alexander. Delving into an impressively deep pool of patristic literature written between 130-313 CE, Christian Thru Djurslev offers original interpretations of various important authors, from the learned lawyer Tertullian to the 'Christian Cicero' Lactantius, and from the apologist Tatian to the first church historian Eusebius. He demonstrates that the early Christian adaptations of the Alexandrian myths created a new tradition that has continued to develop and expand ever since. This innovative work of reception studies is important reading for all scholars of Alexander the Great and early church history.

The Christian Tradition, formerly published by Pearson/Prentice Hall, introduces students at the beginning of the third millennium to a religion that has evolved over and shaped two previous millennia. With particular focus placed on the social and cultural background to this tradition, the text provides a stimulating survey of the history of Christianity from its Jewish roots to the challenges it faces in the twenty-first century. This innovative text weaves a consideration of the arts, spirituality, religious life and practice-especially among the laity, women, and others outside the dominant institutional

J.H. Hexter's classic survey of the historical roots of Judaism and Christianity is now available with a new preface and updated bibliography. The book defines the main components, principal influences, and most significant transformations of ancient Hebrew religious beliefs and then considers those of Christianity, showing how early Christianity arose out of the Judaic heritage. The first part of the book deals with the evolution of ancient Israel down to the end of the sixth century B.C.; the second chronicles the transition from Judaism to Christianity and the struggle of the early Christian communities against the pressures and power of the Roman Empire. Ranging over some 1500 years of ancient history, the book illuminates the cultural and intellectual impact of the Judaeo-Christian tradition.

From divine visions to self-tortures, some strange mystical experiences have shaped the Christian tradition as we know it. Full of colourful detail, *Mystics of the Christian Tradition* examines the mystical experiences that have determined the history of Christianity over two thousand years, and reveals the often sexual nature of these encounters with the divine. In this fascinating account, Fanning reveals how God's direct revelation to St Francis of Assisi led to his living with lepers and kissing their sores, and describes the mystical life of Margery Kempe who 'took weeping to new decibel levels'. Through presenting the lives of almost a hundred mystics, this broad survey invites us to consider what it means to be a mystic and to explore how people such as Joan of Arc had their lives determined by divine visions. *Mystics of the Christian Tradition* is a comprehensive guide to discovering what mysticism means and who the mystics of the Christian tradition actually were.

This remarkable account by an award-winning historian details the responses to the fall of Rome by the church fathers, who set the pattern for interpreting this momentous event for all succeeding centuries. "To speak about the decline and fall of the Roman empire as 'the social triumph of the ancient church' is to look at the events associated with that 'memorable revolution' . . . through the eyes of the victors," writes the author. "The thoroughness of the victors has often seen to it that there remains no other way for us to view those events. Not only are we--for this period as for so many others throughout most of human history--denied access to the mind of the common people as they watched this history in the making, such that we are forced to depend on the documents provided by various of the elites of the fourth and fifth centuries; but among the documents of those elites, only some have been permitted to survive." Jerome, Christian humanist and translator of the Bible into Latin, represents an apocalyptic view of the crisis. Eusebius, court theologian and founder of church history, saw the fall of Rome as the sign of a new

order, the "Christian Empire." And Augustine, fountainhead of much of Western thought during the millennium that followed, used it as the basis for his City of God. The unifying theme in this historical panorama is the final revisionist view of the fall by its greatest historian, Edward Gibbon. All of these interpretations of the fall of Rome continue to live today and deeply influence our understanding of Western culture.

This book, authored by an international group of scholars, focuses on a vibrant central current within the history of Russian legal thought: how Christianity, and theistic belief generally, has inspired the aspiration to the rule of law in Russia, informed Russian philosophies of law, and shaped legal practices. Following a substantial introduction to the phenomenon of Russian legal consciousness, the volume presents twelve concise, non-technical portraits of modern Russian jurists and philosophers of law whose thought was shaped significantly by Orthodox Christian faith or theistic belief. Also included are chapters on the role the Orthodox Church has played in the legal culture of Russia and on the contribution of modern Russian scholars to the critical investigation of Orthodox canon law. The collection embraces the most creative period of Russian legal thought—the century and a half from the later Enlightenment to the Russian emigration following the Bolshevik Revolution. This book will merit the attention of anyone interested in the connections between law and religion in modern times.

In this sixth volume of The New Church's Teaching Series, Rebecca Lyman introduces us to the world of the early church. Beginning with the Jewish, Greek, and Roman cultures in which the first followers of Jesus lived and worshiped, she traces the growth of the Christian church's theology, worship, leadership, and ethics through its first six centuries, ending with Augustine of Hippo. Early Christian Traditions offers perceptive insights into the early church's intense conflicts that reveal the often thin line between orthodoxy and heresy, between true and false teachers, and among the many competing versions of Christianity. Lyman describes the early church's family quarrels Gnosticism, Donatism, Arianism as well as the theological, political, and linguistic issues that went into the making of the great creeds and established the apostolic tradition."
