People and organizations at every stage of Internet sophistication face the same burning question: How should they change in order to succeed in a digital world? Renowned thinker and business trailblazer Rosabeth Moss Kanter says answers will be found not in cyberspace but on the ground, where real people connect, collaborate, and form thriving human communities. In this eye-opening book, Kanter explores what she calls "e-culture"-a new way of living and working that will transform every aspect of today's organizations. Kanter argues that networks of relationships, not just new technologies, permit speed and seamlessness, encourage creativity and collaboration, and release energy and brainpower-the "soul" of e-business. And every organization-from dotcoms to dotcom-enablers (technology and service providers) to wannadots (traditional companies struggling to embrace the Web)- must learn to build and foster them. Based on a landmark project with rare on-site access, over 300 interviews, and a 785-company global survey, *Evolve!* provides a hands-on blueprint for adopting the core principles of e-culture: treat strategy as improvisational theater; nurture networks of partners; reconstruct organizations as online and offline "communities"; and attract and retain top talent. With colorful and memorable stories, Kanter illuminates vast differences between older, more conservative companies and aggressive, born-digital dotcoms. She takes us deep inside evolving organizations-including IBM, eBay, Reuters, Sun Microsystems, Razorfish, Abuzz, Barnesandnoble.com, Williams-Sonoma, and pioneering public schools-to provide best practices from e-culture pacesetters and cautionary lessons from Internet laggards. Defining the skills leaders need to master change, she reveals how dotcoms and dotcom-enablers can grow fast while crafting a great culture, and how wannadots can benefit by becoming Web-enabled. For anyone who wants to realize the potential and avoid the pitfalls of the Internet age, this pathbreaking book identifies and analyzes the emergence of e-culture-and provides a lively, roll-up-your-sleeves guide to profiting from tomorrow. Rosabeth Moss Kanter is the Ernest L. Arbuckle Professor of Business Administration at Harvard Business School. She has been named one of the "50 Most Powerful Women in the World" by *The Times of London*, and is the author of several bestselling books.

value. Drawing on a decade of research, Christian Seelos and Johanna Mair transcend widely held misconceptions, getting to the core of what a sound impact strategy entails in the nonprofit world. They reveal an overlooked nexus between investments that might not pan out (innovation) and expansion based on existing strengths (scaling). In the process, it becomes clear that managing this tension is a difficult balancing act that fundamentally defines an organization and its impact. The authors examine innovation pathologies that can derail organizations by thwarting their efforts to juggle these imperatives. Then, through four rich case studies, they detail innovation archetypes that effectively sidestep these pathologies and blend innovation with scaling. Readers will come away with conceptual models to drive progress in the social sector and tools for defining the future of their organizations.

In a book presented in a Q-and-A format, the authors explain what social entrepreneurs are, how their organizations function, what challenges they face and how readers can get involved in the efforts that social entrepreneurs are spearheading.
