A harmonious blend of the theoretical and practical aspects of educational psychology, this student-friendly text provides a base for the understanding of the subject. The book discusses the various aspects of growth and development, specifically during childhood and adolescence, and accords due importance to the cognitive aspect of human behaviour with elaborate text on intelligence, creativity, thinking, reasoning and problem-solving. Besides maintaining a logical progression of topics, the author has interspersed the text with examples and illustrations to provide an in-depth analysis of the subject matter. The book is ideally suited for the B.Ed. and B.A. (Education) courses but can also be a valuable reference for teachers, teacher-trainees, and practising counsellors at various levels of school education. KEY FEATURES • Cogent and coherent style of writing • Assignment problems and sample tests at the end of various chapters • Wide range of examples and over 50 illustrations to support and explain the topics discussed

The big ideas of educational psychology covered in 10 chapters The first book of its kind, Essentials of Educational Psychology focuses squarely on the core concepts, principles, and underlying assumptions of the field of educational psychology-the big ideas of ed psych. Because of this focus and the book’s exceptionally direct and clear presentation, Essentials is a 10-chapter book that can truly be covered and understood in a term. It is a book that enables and empowers students to understand the value and essential importance of educational psychology to becoming a qualified and effective teacher.

This revised and expanded edition is a sequel to the first edition which was warmly received by the student and teaching community for its indepth analysis and refreshing approach to the subject. Psychology of Individual differences Transfer of Learning or Training Emotional Development and Emotional Intelligence Learning Disabilities and Learning Disabled Children Beginning with an introduction to the nature and scope, and the various schools of psychology, the book dis-cusses the systems propounded by Freud, Adler, Jung and Piaget, taking into account their critical importance to the subject. It then focuses on the psychology of growth and development, psychology of individual differences, motivation, attention and personality, with an emphasis on the individual's attitude towards learning, and the factors influencing learning. The text also elaborates the nature and theories of learning and the aspects of memory such as remembering and forgetting. The cognitive aspect, i.e. intelligence, and vital topics like creativity and the psychology of thinking, reasoning and problem-solving have been accorded due promi-nence. A detailed discussion on exceptional children and learning disabled children together with the educational measures for overcoming such disabilities is also included. The text concludes with an important aspect of human behaviour, namely, adjustment. Interspersed with examples, illustrations and tables, this text is ideally suited for postgraduate students of education and psychology. It can also be profitably used by teachers, teacher-educators, guidance and counselling personnel, and administrators of educational institutions.

Prev. ed. (1998) cataloged as: Case studies / Dinah L. Jackson, Jeanne Ellis Ormrod.

This 'examination-oriented' and 'student-oriented' book is primarily designed to meet examination needs of the students of BEd, BT, LT and BA (Education). Its subject matter is authentic, has all-encompassing coverage and is deeply insightful. The text has been supplemented with charts, diagrams, figures and tables to make the subject interesting and more comprehensible. Such a unique combination brings crystal clarity into the concepts and enables students to obtain maximum marks in the examination. With a view to provide a comprehensive overview of educational psychology, readers are introduced to the lives and works of some fifty great educational psychologists. This enables the students to unlock the doors of a treasure house of information, knowledge and wisdom enshrined in the thought and practices propounded by these masterminds. The third edition adds some new thoughts and approaches. NEW IN THE THIRD EDITION • Education of children with special needs • Inclusive education • Counselling • Albert Bandura's theory of social learning • Principles of growth and development • Detailed discussion on Erickson's theory of 8-stages of development of a child • Factors that affect learning • Augmented question bank at the end of chapters that includes objective-type questions, like MCQs and Fill in the blanks • Improved readability

Written in an accessible and engaging style, this second edition of The Psychology of Education addresses key concepts from psychology which relate to education. Throughout the text the author team emphasise an evidence-based approach, providing practical suggestions to improve learning outcomes, while fictional case studies are used in this new edition to provide students with a sense of what psychological issues can look like in the classroom. Activities around these case studies give students the chance to think about how to apply their theoretical knowledge to these real-world contexts. 'Key implications' are drawn out at appropriate points, and throughout the book students are provided with strategies for interrogating evidence. Key terms are glossed throughout the book and chapters are summarised and followed by suggestions for further reading. A chapter on Learning interactions and social worlds is new to this edition. The following chapters have all been extensively updated: Learning Assessment Individual differences and achievement Student engagement and motivation The educational context Society and culture Language Literacy Inclusive education and special educational needs Behaviour problems Dealing with behaviour problems. This book is essential reading for undergraduate students of Education Studies and Psychology as well as trainee teachers on BA, BEd and PGCE courses. It will also be of use to postgraduates training to be educational psychologists.

Conceptual change research investigates the processes through which learners substantially revise prior knowledge and acquire new concepts. Tracing its heritage to paradigms and paradigm shifts made famous by Thomas Kuhn, conceptual change research focuses on understanding and explaining learning of the most the most difficult and counter-intuitive concepts. Now in

Where To Download Essentials Of Educational Psychology 2nd Edition

its second edition, the International Handbook of Research on Conceptual Change provides a comprehensive review of the conceptual change movement and of the impressive research it has spawned on students' difficulties in learning. In thirty-one new and updated chapters, organized thematically and introduced by Stella Vosniadou, this volume brings together detailed discussions of key theoretical and methodological issues, the roots of conceptual change research, and mechanisms of conceptual change and learner characteristics. Combined with chapters that describe conceptual change research in the fields of physics, astronomy, biology, medicine and health, and history, this handbook presents writings on interdisciplinary topics written for researchers and students across fields.

Developmental and Educational Psychology for Teachers brings together a range of evidence drawn from psychology to answer a number of critical educational questions, from basic questions of readiness – for example, when is a child ready for school, through to more complex matters, such as how does a teacher understand and promote good peer relationships in their classroom? The answers to these and other questions discussed draw here on the interplay between a teachers' craft expertise and their knowledge of evidence and theory from developmental and educational psychology. Presenting a range of classic theories and contemporary research to help readers understand what the key issues are for teachers and other professionals, this book aides informed educational decisions in situations such as: inclusion, ability grouping, sex differences, developing creativity, home and peer influences on learning, and developing effective learners. Teachers in early years, primary and secondary settings are routinely faced with questions regarding the development of children. This not only relates to the planning and delivery of lessons, but also to the mental and physical wellbeing of the children and adolescents that they teach. The pedagogical features of this book are accessible and clearly presented, including focus questions that direct the reader's attention to key issues, activity posts that point the reader to meaningful and relevant research and show the practical applications of material covered, and extension material that gives depth to many of the topics covered. This book aims to inform the practice of both in-service and trainee teachers, addressing issues that are relevant to their practice. With no other detailed and accessible text presenting this evidence and theory specifically for an audience of practicing and trainee teachers currently on the market, this book will be of essential reading to practicing and trainee teachers for early years, primary and secondary education and other related educational contexts such as educational psychologists, counsellors, paediatric and child doctors and nurses.

A comprehensive introduction to educational psychology, this volume is inclusive of all of the essentials—covering history, profiles, theories, applications, research, case studies, current events, issues, controversies, and more. • Presents case studies that survey current social justice and educational equity issues • Includes a historical timeline that allows readers to understand how issues have developed over time • Offers a glossary of key terms that provides context for deeper understanding • Provides a resource list so readers can investigate issues on their own • Features a bibliography of citable resources that serves as a foundation for further research
