Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

This textbook, originally by D. Annand and H. Dauderis, was intended for a first course in introductory financial accounting. It focuses on core introductory financial accounting topics that match pre-requisite requirements for students advancing to Intermediate Financial Accounting. A corporate approach is utilized versus beginning with a sole proprietorship emphasis and then converting to a corporate approach; this consistency throughout the book reduces confusion for the introductory student. This most recent revision by D. Marchand converted the text from IFRS to reflect the Generally Accepted Accounting Principles of the United States (U.S. GAAP).

Contains, for each text chapter: pretest, chapter overview, detailed chapter review - including study tips, practice test questions and demonstration problems with worked-out solutions.

Every German student of business administration needs to have a basic understanding of accounting according to German GAAP, and thanks to globalization many courses about German accounting are nowadays held in English to improve the language skills of the students. In addition many foreign subsidiaries of German companies have to prepare their part of consolidated financial statements according to German GAAP. So far, these professionals can rely on German literature only. The first part of the book offers a compact introduction to financial statements according to German GAAP, the second part comprises exercises on individual topics with solutions and case studies for in-depth and effective learning. This introduction provides ideal support for German-speaking students taking English-speaking lectures in the field and is furthermore valuable for professionals looking for explanations when preparing the data for consolidated financial statements. Includes exercises and case studies for practice Ideal textbook for students of German Universities attending English-speaking lectures in financial management Ideal introduction for professionals with a

succinct explanation and additional support with a glossary and vocabulary

Ideal for graduate, MBA, and higher-level undergraduate programs, **FINANCIAL ACCOUNTING: AN INTRODUCTION TO CONCEPTS, METHODS, AND USES** presents both the basic concepts underlying financial statements and the terminology and methods that allow you to interpret, analyze, and evaluate actual corporate financial statements.

**Financial Accounting: An Introduction** presents an expansive and up-to-date treatment of an ever-important discipline. Without over-simplifying the subject, Augustine Benedict and Barry Elliott have created a progressive guide to financial accounting which tackles not only the fundamentals, but also includes coverage of new and emerging topics - chief among them IFRS. Comprehensive and rigorous, **Financial Accounting** encompasses a number of perspectives, ensuring that every aspect of each topic is examined in depth. Starting from the first concepts, the authors proceed to show how issues in financial accounting affect individuals, banking practices, sole traders, partnerships, and limited companies.

This text is intended for a first course in introductory financial accounting. It was updated to reflect current International Financial Reporting Standards (IFRS). For example, it reflects the recent change in IAS38, para. 98, allowing the use of multiple methods in amortizing intangible assets. It focuses on core Introductory Financial Accounting topics that match pre-requisite requirements for students advancing to Intermediate Financial Accounting. Excluded are advanced topics that are covered in Intermediate Financial Accounting, such as leases and bond amortization. The text takes a corporate approach (vs. beginning with a sole proprietorship emphasis and then converting to a corporate approach); this consistency throughout the book reduces confusion for the introductory student. The book covers all essential topics: the accounting cycle, merchandising, assigning costs to inventory, cash and receivables, property, plant and equipment, debt financing, equity financing, statement of cash flows, financial statement analysis, and proprietorships and partnerships. Additionally, this version of the open text is supported by Lyryx Learning, offering at an affordable price editorial services to develop and adapt the content, formative online assessment, course supplements, and daily support to both the students and instructors.
