Winner of the 2015 James Beard Award for Best Beverage Book and the 2015 IACP Jane Grigson Award. A revolutionary approach to making better-looking, better-tasting drinks. In Dave Arnold's world, the shape of an ice cube, the sugars and acids in an apple, and the bubbles in a bottle of champagne are all ingredients to be measured, tested, and tweaked. With *Liquid Intelligence*, the creative force at work in Booker & Dax, New York City's high-tech bar, brings readers behind the counter and into the lab. There, Arnold and his collaborators investigate temperature, carbonation, sugar concentration, and acidity in search of ways to enhance classic cocktails and invent new ones that revolutionize your expectations about what a drink can look and taste like. Years of rigorous experimentation and study—botched attempts and inspired solutions—have yielded the recipes and techniques found in these pages. Featuring more than 120 recipes and nearly 450 color photographs, *Liquid Intelligence* begins with the simple—how ice forms and how to make crystal-clear cubes in your own freezer—and then progresses into advanced techniques like clarifying cloudy lime juice with enzymes, nitro-muddling fresh basil to prevent browning, and infusing vodka with coffee, orange, or peppercorns. Practical tips for preparing drinks by the pitcher, making homemade sodas, and building a specialized bar in your own home are exactly what drink enthusiasts need to know. For devotees seeking the cutting edge, chapters on liquid nitrogen, chitosan/gellan washing, and the applications of a centrifuge expand the boundaries of traditional cocktail craft. Arnold's book is the beginning of a new method of making drinks, a problem-solving approach grounded in attentive observation and creative techniques. Readers will learn how to extract the sweet flavor of peppers without the spice, why bottling certain drinks beforehand beats shaking them at the bar, and why quinine powder and succinic acid lead to the perfect gin and tonic. *Liquid Intelligence* is about satisfying your curiosity and refining your technique, from red-hot pokers to the elegance of an old-fashioned. Whether you're in search of astounding drinks or a one-of-a-kind journey into the next generation of cocktail making, *Liquid Intelligence* is the ultimate standard—one that no bartender or drink enthusiast should be without.

Victor Rios has a vibrant reputation as America's leading ethnographer of Latino youth. His personal story going from drug pusher (selling heroin on the streets as a teenager) to a hard worker at a mechanic shop within a matter of weeks shows how he stands in the place of the

Latino youths he studies. His story underscores the degree to which delinquent urban youths can become adaptable, fluid, amenable individuals, able to shift their views of the world as well as their actions. Rios rejects the old storyline that said gangs are bad and they do bad things because they are bad people. Kids on the street, he argues, can drift between different identities, indeed, they can shift seamlessly between responsible and deviant displays within a few hours time. The key to understanding gang-associated youth lies in analysis of the way authority figures (teachers and police officers) interact with young people. The kids need caring adults who offer tangible resources. Story and characters are always front-and-center in Rios's narrative: Jorge, Mark, Wilson, and others, are boys we get to know as they negotiate day-to-day life on the streets and across institutional settings. We learn a great deal about Cholo subculture, the clothing and hairstyles, and the argot that are adopted by Latino youth in response to the forces that seek to marginalize or punish them. The crisis of a perceived epidemic of police brutality in our post-Ferguson era is a product of culture in Rios's view: contested symbols, negative interactions, and day-to-day encounters that freeze youth identities as gang-associated, and that freeze authority identities as negative shapers of youth attitudes and actions are the dynamic. Fear of young males of color leads to police misreading and dehumanizing of young black and Latino men. Rios raises our awareness of how this dynamic operates by studying his subjects whole: following young gang members into their schools, their homes, their community organizations, their detention facilities, and watching them interact with police, watching them grow up to become fathers, get jobs, get rap sheets. Get killed. This book will be a landmark contribution to the social psychology of poverty and crime."

and health. For each nutrient the committee presents what is known about how it functions in the human body, which factors may affect how it works, and how the nutrient may be related to chronic disease. Dietary Reference Intakes provides reference intakes, such as Recommended Dietary Allowances (RDAs), for use in planning nutritionally adequate diets for different groups based on age and gender, along with a new reference intake, the Tolerable Upper Intake Level (UL), designed to assist an individual in knowing how much is "too much" of a nutrient.
