If you thought it was worth hearing the insights of a man at the head of a major corporation or who has turned around a disaster-prone technology company, here's a new level. This book is packed with ideas for governance, leadership and life from the man behind the city that's home to the world's tallest tower, largest mall and two million people from 220 nationalities - backed by the world's busiest airport and the biggest manmade seaport on earth. This is Dubai and its ruler, Sheikh Mohammed. And these are his inspirations for leadership and success. Available for the first time in an updated and refreshed Pocket Edition, Sheikh Mohammed shares the many important ideas which not only sit at the heart of his vision for his nation but are also central to the wellbeing of society and personal happiness. By bringing together these unique experiences, ideas and thoughts, Flashes of Thought offers a compelling routemap and blueprint for professional and personal fulfilment.

Draws on research with hundreds of interviewees to identify the pervasive influence of cultural shame, discussing how women can recognize the ways in which shame influences their health and relationships and can be transformed into courage and connectivity.

Flashes of insight—the "Eureka!" moments that produce new and useful ideas in a single thought—are behind some of the world's most creative and practical innovations. This book shows how to cultivate more and better flashes of insight by harnessing the science and practice of the "seventh sense." Drawing from psychology, neuroscience, Asian philosophy, and military strategy, William Duggan illustrates the power of the seventh sense to help readers aspire to and achieve more in their personal and professional lives. His examples include Gandhi, Joan of Arc, Starbucks founder Howard Shultz, and executives and students he has taught in his classes. His book presents specific steps in the form of three practical tools to help prepare the mind, see and seize opportunity, and follow through on one's resolution. Based on Duggan's perennially popular Columbia Business School course, this book teaches the mental skills and discipline that power the seventh sense.

This important collection of anecdotes and reminiscences from Sheikh Mohammed bin Rashid Al Maktoum is published to mark the occasion of his fifty years in public service, which began with his appointment as Dubai's Minister of Defence in 1968.These stories tell of the vision behind Dubai's meteoric growth from a small and bustling trading port to an international metropolis at the heart of global business. They record the evolution of the United Arab Emirates from a shared ideal to a nation where more than 195 nationalities live and work in peace, harmony and prosperity. And they reveal insights from a man whose drive, determination and will to succeed have become legendary.Within these stories lies the heart of Sheikh Mohammed the statesman, the equestrian, the poet and the leader. They are written with the intent to inspire and inform new generations of readers, and to celebrate the achievements of this young and vibrant nation and the people who shaped it.This celebration of a life in service is unavoidably incomplete. As Sheikh Mohammed himself indicates, there is still so much left to do. As a record of the first fifty years alone, however, it forms part of a remarkable legacy.Other titles written by Sheikh Mohammed and published by Explorer include Zayed, Reflections on Happiness & Positivity, Flashes of Verse and Two Great Leaders.

Drawing on ten years of working with businesses, nonprofits, governments, and families, the authors combine the latest insights from neuroscience and psychology with practical advice to explain how to turn feedback into productive listening and learning.

Since Einstein first described them nearly a century ago, gravitational waves have been the subject of more sustained controversy than perhaps any other phenomenon in physics. These as yet undetected fluctuations in the shape of space-time were first predicted by Einstein's general theory of relativity, but only now, at the dawn of the twenty-first century, are we on the brink of finally observing them. Daniel Kennefick's landmark book takes readers through the theoretical controversies and thorny debates that raged around the subject of gravitational waves after the publication of Einstein's theory. The previously untold story of how we arrived at a settled theory of gravitational waves includes a stellar cast from the front ranks of twentieth-century physics, including Richard Feynman, Hermann Bondi, John Wheeler, Kip Thorne, and Einstein himself, who on two occasions avowed that gravitational waves do not exist, changing his mind both times. The book derives its title from a famously skeptical comment made by Arthur Stanley Eddington in 1922--namely, that "gravitational waves propagate at the speed of thought." Kennefick uses the title metaphorically to contrast the individual brilliance of each of the physicists grappling with gravitational-wave theory against the frustratingly slow progression of the field as a whole. Accessibly written and impeccably researched, this book sheds new light on the trials and conflicts that have led to the extraordinary position in which we find ourselves today--poised to bring the story of gravitational waves full circle by directly confirming their existence for the very first time.

The extraordinary #1 New York Times bestseller about the ability of books to feed the soul even in the darkest of times. Nominated as one of America's best-loved novels by PBS's The Great American Read. When Death has a story to tell, you listen. It is 1939. Nazi Germany. The country is holding its breath. Death has never been busier, and will become busier still. Liesel Meminger is a foster girl living outside of Munich, who scratches out a meager existence for herself by stealing when she encounters something she can't resist--books. With the help of her accordion-playing foster father, she learns to read and shares her stolen books with her neighbors during bombing raids as well as with the Jewish man hidden in her basement. In superbly crafted writing that burns with intensity, award-winning author Markus Zusak, author of I Am the Messenger, has given us one of the most enduring stories of our time. "The kind of book that can be life-changing." —The New York Times "Deserves a place on the same shelf with The Diary of a Young Girl by Anne Frank." —USA Today DON'T MISS BRIDGE OF CLAY, MARKUS ZUSAK'S FIRST NOVEL SINCE THE BOOK THIEF.

A brilliant detective thriller with a supernatural twist! Charley has visions . . .Flashes of things she can't explain. A girl in trouble. The sound of trains. She feels certain they are clues to a crime. But no one will believe her. Until she meets Tom, a young policeman on his first case: an accidental death on the railway tracks, not far from where Charley lives. Was it an accident, suicide . . . or murder? The attraction between Charley and Tom is instant, but can they work together to find out what really happened on the tracks before it happens again?

The great debate over the Big Bang and the quest to understand the fate of the universe Today, the Big Bang is so entrenched in our understanding of the cosmos that to doubt it would seem crazy. But as Paul Halpern shows in Flashes of Creation, just decades ago its mere mention caused sparks to fly. At the center of the debate were Russian American physicist George Gamow and British astrophysicist Fred Hoyle. Gamow insisted that a fiery explosion explained how the elements of the universe were created. Attacking the idea as half-baked, Hoyle countered that the universe was engaged in a never-ending process of creation. The battle was fierce. In the end, Gamow turned out to be right -- mostly -- and Hoyle, along with his many achievements, is remembered for giving the theory the silliest possible name: "The Big Bang." Halpern captures the brilliance of both thinkers and reminds us that even those proved wrong have much to teach us about boldness, imagination, and the universe itself.
