A balanced, thought-provoking series of selected readings on professionalism and ethics in engineering. Addresses such topics as the concept of professionalism; education and maintenance of competence; registration; the role of professional and technical societies; professional autonomy; engineers' responsibilities for the social effects of engineering practice; whistle-blowing; and the formulation and enforcement of codes of ethics. Includes case studies of the ethical dilemmas faced in engineering practice, compilations of major codes of engineering ethics, and references for further reading.

Florida Administrative Practice, Eleventh Edition is the only practice manual to provide an in-depth discussion of the procedural aspects of administrative litigation. The Administrative Procedure Act is a dynamic area of the law, and the new Eleventh Edition brings you up-to-date with the most recent statutory changes, including discussion of: New discussion regarding DOAH's centralized electronic database 2016 amendments to F.S. 120.57 Authority to reconsider and vacate prior final order in disciplinary proceedings Judicial Review Revised statutes and rules New case law In addition, the manual explores other areas of substantive law where administrative procedures predominate, including environmental and land use law and certificates of need determinations. With extensive case law and statute references, as well as an appendix featuring the full text of the APA with tracing and conversion tables, this reference will be a valuable addition to the library of experienced administrative law practitioners and those needing a trustworthy guide through this complex area of law.

This book provides a comprehensive overview of the concept of "Total Exposure Health" and presents details on subject areas which make up the framework. It provides in-depth coverage of the science and technology supporting exposure and risk assessment. This includes advances in toxicology and the "-omics" as well as new techniques for exposure assessment. The book concludes with a discussion on bioethics implications, including ethical considerations related to genetic testing. ? Discusses advances in exposure monitoring Presents a systems biology approach to human exposures Examines how overall well-being translates to worker productivity Considers the link between work-related risk factors and health conditions Covers the study of genomics in precision medicine and exposure science Explores bioethics in genomic studies Aimed at the exposure professionals (industrial hygienists, toxicologists, public health, environmental engineers), geneticists, molecular biologists, engineers and managers in the health and safety industry as well as professionals in the public administration field.

Covering all aspects of the design-build delivery system, this valuable guide presents the pros and cons and compares them with the traditional project delivery method. You'll learn how to easily navigate the thicket of licensing considerations, evaluate bonding and insurance implications, and analyze the performance guarantees of the design-build concept. You also get practical suggestions for effective drafting of design-build contracts.

Florida Administrative Practice, Thirteenth Edition is the only practice manual to provide an in-depth discussion of the procedural aspects of Florida administrative litigation. The Administrative Procedure Act is a dynamic area of the law, and the new Thirteenth Edition brings you up-to-date with the most recent developments in this area, including: Updated rules, statutes, and recent case law—including the complete Uniform Rules of Procedure and the Administrative Procedure Act—and removal of obsolete material. New material related to the COVID-19 pandemic; de novo review under new Art. V, §21, of the Florida Constitution; reinstatement of licenses; final orders; the Florida Fish and Wildlife Commission; record requirements on appeal; and electronic notarizations. Rewrites of sections on Procedural Due Process, procurement specifications, and judicial review under F.S. 120.68. Updated material on administrative searches and seizures, evidence, Certificates of Need, and Requests for Technical Advice. Elaboration on rule challenges, hearsay evidence, hearing denial, licensure requirements, agency investigation, emergency orders, environmental permitting, mediation, environmental enforcement mechanisms, water management districts, comprehensive planning, exhaustion of remedies, and mootness. Clarification of terms and case descriptions. In addition, the manual explores other areas of substantive law where administrative procedures predominate, including environmental and land use law and certificates of need determinations. With extensive case law and statute references, as well as an appendix featuring the full text of the APA with tracing and conversion tables, this reference will be a valuable addition to the library of experienced administrative law practitioners and those needing a trustworthy guide through this complex area of law.
