Features step-by-step examples based on actual data and connects fundamental mathematical modeling skills and decision making concepts to everyday applicability Featuring key linear programming, matrix, and probability concepts, "Finite Mathematics: Models and Applications" emphasizes cross-disciplinary applications that relate mathematics to everyday life. The book provides a unique combination of practical mathematical applications to illustrate the wide use of mathematics in fields ranging from business, economics, finance, management, operations research, and the life and social sciences. In order to emphasize the main concepts of each chapter, "Finite Mathematics: Models and Applications" features plentiful pedagogical elements throughout such as special exercises, end notes, hints, select solutions, biographies of key mathematicians, boxed key principles, a glossary of important terms and topics, and an overview of use of technology. The book encourages the modeling of linear programs and their solutions and uses common

computer software programs such as LINDO. In addition to extensive chapters on probability and statistics, principles and applications of matrices are included as well as topics for enrichment such as the Monte Carlo method, game theory, kinship matrices, and dynamic programming. Supplemented with online instructional support materials, the book features coverage including: Algebra Skills Mathematics of Finance Matrix Algebra Geometric Solutions Simplex Methods Application Models Set and Probability Relationships Random Variables and Probability Distributions Markov Chains Mathematical Statistics Enrichment in Finite Mathematics An ideal textbook, "Finite Mathematics: Models and Applications" is intended for students in fields from entrepreneurial and economic to environmental and social science, including many in the arts and humanities. Carla C. Morris, PhD, is Assistant Professor of Mathematics in the Associate in Arts Program at the University of Delaware. A member of The Institute for Operations Research and the Management Sciences and the Mathematical Association of America, Dr. Morris teaches courses ranging from college algebra to calculus and statistics. Robert M. Stark, PhD, is Professor Emeritus in the Departments of Mathematical Sciences and Civil and Environmental Engineering at the University of Delaware. Dr. Stark's teaching and research interests include applied probability, mathematical optimization, operations research, and mathematics education.

Features the techniques, methods, and applications of calculus using real-world examples from business and economics as well as the life and social sciences An introduction to differential and integral calculus, Fundamentals of Calculus presents key topics suited for a variety of readers in fields ranging from entrepreneurship

My Doll and Me: Superheroes Fighting Bullying with Kindness promotes a pro-kindness, anti-bullying movement since research has shown that when children are taught how to be kind to one another, bullying is significantly reduced in schools. Inclusion of well-loved superhero characters and the popularity of dolls should connect to and engage young girls and spark an interest in reading the book. The book encourages girls to make a kindness pledge, suggests ten no-cost or low-cost acts of kindness they can perform and includes kindness slogan and JUST FOR FUN FACTS to test their understanding of the information in the book.

Everything changes. We are currently immersing in the Digital Era and going through in-depth change. The companies, economy, society, and even us as individuals are changing (or should be). Managing in the Digital Era is a new challenge for entrepreneurs, managers, marketeers,

economists, politicians... The impact of change is such that no one is left out. Communication is in the core of these changes, requiring an in-depth review of the Media industry business models and also those of other industries.

Technology, on the other hand, is the major engine of this new Era, and more than ever the leading role will be played by leaders and their teams. Today, any citizen speaks to the world, asks questions and makes demands. This book pictures the changes and the paths that are being designed by world giants, and clarifies the new challenges facing us.

Gifted with a cheerful and open nature, Leofric of Drogand was held to be the most charming man in all of Wessex. Yet there were depths to his character that few understood. Forced to keep secrets from his earliest years, Leofric had become highly skilled when it came to intrigue and subterfuge. It was his taste for adventure that led him to take up a position in Kent's royal court, but spying on the royal household on behalf of Wessex soon ceased to amuse him. Would the dangerous web of lies he found himself surrounded by prove to be his undoing? Or would he find, in the most unlikely of places, the new beginning he never imagined could be his?

Holiness is the very character of God and it is one of the most important areas of our lives where we need to conform to His image. It is a process that will take our whole lives to accomplish. The key to walking forward in this process is to understand the principles regarding this topic from the Word of God and to discover how our culture has shifted through time to become what it represents today. When we realize the blessing and protection released by obedience to holiness, the ability to conform to His character becomes a beautiful process.
