The Fair Housing Act Design Manual: A Manual to Assist Designers and Builders in Meeting the Accessibility Requirements of The Fair Housing Act provides clear and helpful guidance about ways to design and construct housing which complies with the Fair Housing Act. The manual provides direct information about the accessibility requirements of the Act, which must be incorporated into the design, and construction of multifamily housing covered by the Act. It carries out two statutory responsibilities: (1) to provide clear statement of HUD's interpretation of the accessibility requirements of the Act so that readers may know what actions on their part will provide them with a "safe harbor"; and (2) to provide guidance in the form of recommendations which, although not binding meet the Department's obligation to provide technical assistance on alternative accessibility approaches which will comply with the Act, but may exceed its minimal requirements. The latter information allows housing providers to choose among alternative and also provides persons with disabilities with information on accessible design approaches. The Manual clarifies what are requirements under the Act and what are HUD's technical assistance recommendations. The portions describing the requirements are clearly differentiated from the technical assistance recommendations.

NOTE: NO FURTHER DISCOUNT ON THIS PRODUCT TITLE --OVERSTOCK SALE -- Significantly reduced list price Traumatic brain injury (TBI) is a complex condition for which limited research exists. The recent conflicts in Iraq and Afghanistan have resulted in numerous service members returning home after sustaining TBI, and healthcare providers scrambling to find resources on how to treat them. This toolkit is a comprehensive source of inventories and therapy options for treating service members with mild TBI. All aspects of mild TBI are covered, including vestibular disorders, vision impairment, balance issues, posttraumatic headache, temporomandibular dysfunction, cognition, and fitness, among others. With easy-to-follow treatment options and evaluation instruments, this toolkit is a one-stop resource for clinicians and therapists working with patients with mild TBI.
