Common General Conditions Normally a contract provision will allow you to have a separate line item that you can use to estimate your general conditions costs, but another option is to spread the costs into multiple items. One important first step is to understand what these costs are and when they can be built-in into your estimate.

The conditions of the CONTRACT shall be extended to all contracts concluded between CONTRACTOR and subcontractors. Upon CLIENT's and/or ENGINEER's request CONTRACTOR will demonstrate compliance with this clause. Each subcontract shall provide for the right of assignment of the subcontract to CLIENT in the event that the CONTRACT is terminated.

This book provides a comprehensive commentary and guidance to readers on the current edition (1999 Edition) of General Conditions of Contract for Civil Engineering Works (the "General Conditions"), which the Hong Kong Government uses for all its civil engineering contracts. The book describes 46 out of 90 clauses in the General Conditions and their practical application, with explanations in plain and simple language under such headings as Commentary, Analysis and Application. The listing of equivalent clauses of the more user-friendly English ICE Conditions and the international FIDIC Conditions together enables the readers to understand the meaning of the General Conditions from a different context. For those readers who find it easier to read in Chinese, the translation will help them to compare with and understand the original English text. The book is therefore useful to students, consulting engineers, surveyors and lawyers who want to understand more about the Hong Kong construction practice.

The new third edition of the General Conditions of Contract for Construction Works (the GCC 3rd Edition 2015) will replace the GCC 2010. By clarifying certain contract administration procedures and refining some of the risk appropriation clauses, amongst other things, the new GCC 3rd Edition 2015 states that the Contractor's time risk allowances must be indicated on the Programme of Works. It also permits the Contractor to suspend the Works if the Employer fails to make payment on a payment certificate, and includes delay and cost due to excepted risks as an entitlement that the Contractor may claim. A Variable Performance Guarantee is added to the list of securities and it allows for the selection of inflation indices that are appropriate to the type of Works to be carried out. The amendments and use of simpler and more concise wording in the latest edition should also ensure that GCC 3rd Edition 2015 will remain relevant in the future and will provide supportive contract administration and the equitable appropriation of risks. The GCC 3rd Edition 2015 are to be used with the contract documentation format as prescribed by the Construction Industry Development Board in the Standard for Uniformity in Construction Procurement and in conjunction with SANS 1921 to set out the requirements and constraints relating to the manner in which the contract work is to be performed -- Publisher's description.

The new Edition 3 of GC/Works/1, the Government conditions of contract for building and engineering works, came into use on 1st April 1990. Bearing little resemblance to the previous edition first published in 1977, Edition 3 has introduced a number of important new features. In addition to being widely used for Government work, the new contract is likely to be adopted by local authorities and by those private employers favoring the firm control offered by the new conditions. Written by one of the country's leading experts on the contract, this book provides a clause by clause commentary and legal background for all those who need to understand the new form.

Dispute boards were first introduced almost 20 years ago. Since then close to \$100 billion US dollars worldwide has been spent on construction projects that have used dispute boards. Of these, 98% were constructed without any court battles and of the remaining 2%, the dispute board decisions were upheld by either arbitration and/or the court: a truly impressive record. Yet very little is known about what dispute boards are and how they operate. This book provides the knowledge necessary for those actively involved in dispute board work as well as for those who need to learn the process. Important features of the book include: analysis of the differences between dispute adjudication boards, dispute resolution boards and combined dispute boards in-depth discussion of both the existing and historical international case law on dispute boards, including its history under the British common law, European civil law and Muslim Shar' ah law analysis of the differences between the various major standard forms of dispute board rules – FIDIC, International Chamber of Commerce and DBFederation - along with sample wording to add to or modify these forms as needed. analysis of how referrals are made to dispute boards and sample forms. an in-depth discussion of the ethical requirements relating to dispute board members comparison of board selection techniques with guidelines for implementation and recommendations for the parties sample forms for use in establishing a dispute board discussion of site visits, how they should be conducted and sample forms general forms for use in operating a dispute board, form agendas, form reports and their use how to use a dispute board as a sounding board for grievances in depth discussion of how to write a decision or recommendation with examples of actual dispute board decisions and recommendations disclosure forms, questionnaires for potential board members, and comparison of board member agreements and sample forms a discussion of how to effectively use witnesses and the preparation and presentation of witness statements in dispute board hearings forms of notice and procedural rules governing the operation of dispute boards international case studies with claims, responses and decisions analysis of situations requiring the removal of dispute board members and form agreements for their removal discussion of the use of dispute boards in areas other than construction.
