The original HP 17bII wins, hands down. Second, and not too far from it, the HP 17bII+ silver. The slanted keys of the latter are more comfortable to put the finger on, but the rounded keys of the original model are not too bad. (In the current line, I still prefer the ARM 12c but not by much) The gold HP 17bII+ is a very distant third.

Introduces and explains the theory and practice of results-based, solution-focused continuous quality improvement. Fourteen case studies demonstrate the principles described in the text. Annotation copyright Book News, Inc. Portland, Or.

Enjoy a funny sneak-peek at life inside an Ivy League business school from someone who's been there and lived to tell the tale... Excerpt from The Admissions Interview: I can't remember anything on my resume. Oh my God, I've gone blank-what am I doing here? My pulse is racing, my throat is tight, and I'm sweating. Move out of my way, I have to get out of here! After 20 minutes, my nerves finally begin to calm (which would have been great if the interview hadn't finished in 10). The interviewer concludes with, "How do you want to be remembered by your classmates?" Remembered? Because this program will surely be the death of me? He hands me his card when we finish. "Call me if you have any questions." The interview is over. Over? I am numb as I leave his office, stunned that the moment I have worked a lifetime for is now history. Wait! When he said, "It's over," was he referring to the interview or to my future in business? The Blushing MBA is a funny, candid chronicle of one woman's adventure inside an Ivy League business school. It's an inspirational tribute to college, graduate school, and to anyone who has ever dared to enter the wild world of business.

Comprehensive coverage of the time value of money In this book, authors Pamela Peterson Drake and Frank Fabozzi fully expand upon the type of time value of money (TVM) concepts usually presented as part of overviews given in other general finance books. Various TVM concepts and theories are discussed, with the authors offering many examples throughout each chapter that serve to reinforce the tools and techniques covered. Problems and detailed solutions-demonstrated using two different financial calculators, as well as Excel-are also provided at the end of each chapter, while glossary terms are provided in an appendix to familiarize you with basic terms. Provides the basic foundations of the time value of money Covers issues ranging from an introduction of financial mathematics to calculating present/future values and understanding loan amortization Contains problem/solution sets throughout, so you can test your knowledge of the topics discussed Understanding the time value of money is essential, and this reliable resource will help you gain a firm grasp of its many aspects and its real-world applications.

Fully updated and compliant with Excel 2013, this clearly explains the basic calculations for mathematical finance, backed up with simple templates for further use and development, and a workbook with exercises and solutions at the end of each chapter. The examples used are relevant to both managers and students in the UK and overseas. New to this edition Updated glossary of key terms Functions list in English and Euro languages Continuity check on all formats, layouts and charts More worked examples Additional exercises at the end of each chapter to help build models Templates and models available online.
