The Transcontinental Railroad greatly boosted America ' s economy and contributed to the westward expansion. Before the railroad, the fastest way to migrate to the West was by wagon, a journey fraught with danger over plains, deserts, mountains and rivers. Many chose the sea route instead, but people often contracted yellow fever and other diseases. The new railroad was much safer and faster and finally linked the East with the West.

This landmark volume sheds light on the lives and experiences of the Chinese workers who made up 90% of the workforce that built the Central Pacific Railroad--but who have been little understood and largely invisible in traditional accounts of the building of the First Transcontinental Railroad.

In this account of an unprecedented feat of engineering, vision, and courage, Stephen E. Ambrose offers a historical successor to his universally acclaimed Undaunted Courage, which recounted the explorations of the West by Lewis and Clark. Nothing Like It in the World is the story of the men who built the transcontinental railroad -- the investors who risked their businesses and money; the enlightened politicians who understood its importance; the engineers and surveyors who risked, and lost, their lives; and the Irish

and Chinese immigrants, the defeated Confederate soldiers, and the other laborers who did the backbreaking and dangerous work on the tracks. The Union had won the Civil War and slavery had been abolished, but Abraham Lincoln, who was an early and constant champion of railroads, would not live to see the great achievement. In Ambrose's hands, this enterprise, with its huge expenditure of brainpower, muscle, and sweat, comes to life. The U.S. government pitted two companies -- the Union Pacific and the Central Pacific Railroads -- against each other in a race for funding, encouraging speed over caution. Locomotives, rails, and spikes were shipped from the East through Panama or around South America to the West or lugged across the country to the Plains. This was the last great building project to be done mostly by hand: excavating dirt, cutting through ridges, filling gorges, blasting tunnels through mountains. At its peak, the workforce -- primarily Chinese on the Central Pacific, Irish on the Union Pacific -- approached the size of Civil War armies, with as many as fifteen thousand workers on each line. The Union Pacific was led by Thomas "Doc" Durant, Oakes Ames, and Oliver Ames, with Grenville Dodge -- America's greatest railroad builder -- as chief engineer. The Central Pacific was led by California's "Big Four": Leland Stanford, Collis Huntington, Charles Crocker, and Mark Hopkins. The surveyors, the men who picked the route, were latter-day Lewis and Clark types who led the way through the wilderness, living off buffalo, deer, elk, and antelope. In building a railroad, there is only one decisive spot -- the end of the track. Nothing like this great work had been seen in the world when the last spike, a golden one, was driven in at Promontory Summit, Utah, in 1869, as the Central Pacific and the Union Pacific tracks were joined. Ambrose writes with power and eloquence about the brave men -- the famous and the unheralded, ordinary men doing the extraordinary -- who accomplished the spectacular feat that made the continent into a nation.

“ Gripping . . . Chang has accomplished the seemingly impossible . . . He has written a remarkably rich, human, and compelling story of the railroad Chinese. ” — Peter Cozzens, Wall Street Journal A groundbreaking, breathtaking history of the Chinese workers who built the Transcontinental Railroad, helping to forge modern America only to disappear into the shadows of history until now From across the sea, they came by the thousands, escaping war and poverty in southern China to seek their fortunes in America. Converging on the enormous western worksite of the Transcontinental Railroad, the migrants spent years dynamiting tunnels through the snow-packed cliffs of the Sierra Nevada and laying tracks across the burning Utah desert. Their sweat and blood fueled the ascent of an interlinked, industrial United States. But those of them who survived this perilous effort would suffer a different kind of death: a historical one, as they were pushed first to the margins of American life and then to the fringes of public memory. In this groundbreaking account, award-winning scholar Gordon H. Chang draws on unprecedented research to recover the Chinese railroad workers ' stories and celebrate their role in remaking America. An invaluable correction of a great historical injustice, *The Ghosts of Gold Mountain* returns these “ silent spikes ” to their rightful place in our national saga. “ The lived experience of the Railroad Chinese has long been elusive . . . Chang ' s book is a moving effort to recover their stories and honor their indispensable contribution to the building of modern America. ” — New York Times

Empire ' s Tracks boldly reframes the history of the transcontinental railroad from the perspectives of the Cheyenne, Lakota, and Pawnee Native American tribes, and the Chinese migrants who toiled on its path. In this meticulously researched book, Manu Karuka situates the railroad within the violent global histories of colonialism and capitalism. Through an examination of legislative, military, and business records, Karuka deftly explains the imperial foundations of U.S. political economy. Tracing the shared paths of Indigenous and Asian American histories, this multisited interdisciplinary study connects military occupation to exclusionary border policies, a linked chain spanning the heart of U.S. imperialism. This highly original and beautifully wrought book unveils how the transcontinental railroad laid the tracks of the U.S. Empire.

Experience the race of rails to link the country—and meet the men behind this incredible feat—in a riveting story about the building of the transcontinental railroad, brought to life with archival photos. In the 1850s, gold fever swept the West, but people had to walk, sail, or ride horses for months on end to seek their fortune. The question of faster, safer transportation was posed by national leaders. But with 1,800 miles of seemingly impenetrable mountains, searing deserts, and endless plains between the Missouri River and San Francisco, could a transcontinental railroad be built? It seemed impossible. Eventually, two railroad companies, the Central Pacific, which laid the tracks eastward, and the Union Pacific, which moved west, began the job. In one great race between iron men with iron wills, tens of thousands of workers blasted the longest tunnels that had ever been constructed, built the highest bridges that had ever been created, and finally linked the nation by two bands of steel, changing America forever.

Describes the roll played by the transcontinental railroads in the making of modern America during the Gilded Age, discussing the economic panics caused by their debt and how their dependence on donations from the wealthy initiated new forms of corruption. 20,000 first printing.
