Vertical air flow adjustment (manually) To adjust vertical air flow direction, adjust any one of the horizontal louvre blades. When adjusting the horizontal louver blades up or down, always keep the top or bottom blades horizontal. This can effectively prevent water droplets condensing on the front panel of the unit.

~~Hitachi User Manuals~~

Window Air Conditioners. Hitachi window air conditioners offer a more practical and economical option than a central air conditioning system. They are of optimum value for those who require single rooms to be cooled or heated instead of a whole house. The window air conditioners are easy to install and are energy efficient. Hitachi air conditioners include small chassis, which can be installed with ease in small, multi storey apartments.

This completely revised and updated text, now in its Third Edition, continues to explain the underlying concepts of product management. In the process, the book equips the budding as well as the practising managers with sufficient knowledge about how to deal with different problems faced in managing any typical fast moving consumer good or durable product. Divided into three parts, the book provides, in Part I, a macro perspective of the Indian market. Part II offers an analytical discussion interspersed with vivid illustrations on conceptual issues like branding, segmentation, positioning and differentiation. Part III features several new products; it also provides latest information on the products presented in the earlier edition. In addition, it analyzes the current market situation prevailing for a particular product in India. Finally, here, each chapter shows how leading companies are successfully marketing the particular product in the Indian market. WHAT IS NEW IN THIS EDITION : The new edition incorporates the challenges offered by many new trends like growth of modern trade, explosion of the media, and the increasing influence of rural market in India. Chapters on The Indian Market: Emerging Panorama, and New Marketing Challenges expose the students to contemporary concepts and examples. Part III offers new chapters on market analysis on products such as Tea, Soft Drinks, Chocolates, Malted Beverages, Packaged Drinking Water, Tooth-Paste, Detergents, Fairness Cream, Footwear, Mobile Phones, and Digital Camera. Besides, it gives up-to-date background information for other products covered in the earlier edition. The Student CD contains a set of PowerPoint Presentations (PPTs) of 20 products. This well-established study has been widely adopted as a textbook in MBA programmes across the country. The Third Edition is more profusely illustrated with exhibits, diagrams and PPTs, and should be of immense utility and worth to the students of management as well as practising brand managers and executives in the advertising arena.

Written in a lucid way, this book traverses the entire panorama of strategic management.

One of the fascinating aspects of the field of ferroelectric ceramics is its interdisciplinary nature. This aspect is also a source of difficulty for the people working in the field. In a successful team of ferroelectricians the physics theoretician must understand the sintering technologist, the electrical engineer has to communicate with the crystallographer, the organic chemist will interact with the microelectronics engineer, the electron microscopist should collaborate with the systems engineer. It was the purpose of the summer school on ferroelectric ceramics that took place at the Centro Stefano Franscini (ETHZ), Monte Verita, Ascona, Switzerland, in September 1991 to help to build bridges between people from the different disciplines and to draw for them, in the form of tutorial lectures, some of the different facets of ferroelectrics. The book is a written version of this summer school. It contains the following subjects: ferroelectric materials, physics of ferroelectrics, thin films, processing of ferroelectrics and their applications. It represents a cross section of topics of current interest. Materials are presented (L. E. Cross) from the point of view of the user, i. e. the tailoring of materials for specific applications. Two reviews address the important topic of ferroelectric domains and domain walls (I. Fousek and H. Schmid). In the part devoted to theory, three subjects of current interest are presented: phase transition in thin films (D. R. Tilley), weak ferroelectrics (A. K. Tagantsev) and dielectric losses (A. K. Tagantsev).

Maximum PC is the magazine that every computer fanatic, PC gamer or content creator must read. Each and every issue is packed with punishing product reviews, insightful and innovative how-to stories and the illuminating technical articles that enthusiasts crave.
