the extra expense of getting Christmas presents for one another. But each is determined to show their love for the other in this traditional time of giving; each sells a thing they hold most dear in order to afford a present, with poignant and touching results that capture their love for one another.

The classic personal account of Watson and Crick's groundbreaking discovery of the structure of DNA, now with an introduction by Sylvia Nasar, author of *A Beautiful Mind*. By identifying the structure of DNA, the molecule of life, Francis Crick and James Watson

revolutionized biochemistry and won themselves a Nobel Prize. At the time, Watson was only twenty-four, a young scientist hungry to make his mark. His uncompromisingly honest account of the heady days of their thrilling sprint against other world-class researchers to solve one of science's greatest mysteries gives a dazzlingly clear picture of a world of brilliant scientists with great gifts, very human ambitions, and bitter rivalries. With humility unspoiled by false modesty, Watson relates his and Crick's desperate efforts to beat Linus Pauling to the Holy Grail of life sciences, the identification of the basic building block of life. Never has a scientist been so truthful in capturing in words the flavor of his work.

Dr. James W. Kalat's BIOLOGICAL PSYCHOLOGY is the most widely used text in the course area, and for good reason: an extremely high level of scholarship, clear and occasionally humorous writing style, and precise examples. Throughout all eleven editions, Kalat's goal has been to make biological psychology accessible to psychology students, not just to biology majors and pre-meds. Another goal has been to convey the excitement of the search for biological

explanations of behavior, and Kalat delivers. Updated with new topics, examples, and recent research findings--and supported by new online bio-labs, part of the strongest media package yet--this text speaks to today's students and instructors. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Here is a brilliant book that covers the major aspects of nanomaterials production. It integrates the many and varied chemical, material and thermo-dynamical facets of production, offering readers a new and unique approach to the subject. The mechanical,

optical, and magnetic characteristics of nanomaterials are also presented in detail. Nanomaterials are a fast developing field of research and this book serves as both a reference work for researchers and a textbook for graduate students.

Dhandha, meaning business, is a term often used in common trade parlance in India. But there is no other community that fully embodies what the term stands for than the Gujaratis. Shobha Bondre's Dhandha is the story of a few such Gujaratis: Jaydev Patel—the New York Life Insurance agent credited with having sold policies worth \$2.5 billion so far; Bhimjibhai Patel—one of the country's biggest diamond

merchants and co-founder of the ambitious 'Diamond Nagar' in Surat; Dalpatbhai Patel—the motelier who went on to become the mayor of Mansfield County; Mohanbhai Patel—a former Sheriff of Mumbai and the leading manufacturer of aluminium collapsible tubes; and Hersha and Hasu Shah—owners of over a hundred hotels in the US. Travelling across continents—from Mumbai to the United States—in search of their story and the common values that bond them, Dhandha showcases the powerful ambition, incredible capacity for hard work, and the inherent business sense of the Gujaratis.
