Encircling 2 continues Carl Frode Tiller's "poised and effective Rashomon-style exploration of multiple psyches" (Kirkus Reviews) Book two of The Encircling Trilogy continues piecing together the fractured identity of David, the absent central figure who has lost his memory. Three very different friends write letters about his childhood on the backwater island of Otterøya. Ole, a farmer struggling to right his floundering marriage, recalls days in the woods when an act of pretending went very wrong. Tom Roger, a rough-edged outsider slipping into domestic violence, shares a cruder side of David as he crows about their exploits selling stolen motorcycles and spreads gossip about who David's father might be. But it is Paula, a former midwife now consigned to a nursing home, who has the most explosive secret of all, one that threatens to undo everything we know about David. With a carefully scored polyphony of voices and an unwavering attention to domestic life, Carl Frode Tiller shows how deeply identity is influenced by our friendships. The Encircling Trilogy is an innovative portrayal of one man's life that is both

While the health effects of many aspects of life, from diet to marital status, have been extensively explored, little study has been made of the health effects of work. Covering such topics as on-the-job dangers, the role of unions in worker protection, and occupational health in both developed and developing countries, this collection of articles conclusively demonstrates the negative impact that neglect of citizens' working lives has on public health. With more Americans dying each year from job-related causes than were killed in a decade of combat in Vietnam, "*Health and Work Under Capitalism*" is a long-overdue and unusually significant book.

In FY 1990, Congress directed the Secretary of the Navy to commission a study by the National Academy of Sciences for the production of an integrated technology plan for the evolution of aircraft carriers in the first half of the twenty-first century. The House-Senate conferees emphasized "that the product of this study is to be a technology plan for the evolution of sea bases for the most efficient and economical accommodation of tactical air power in the first half of the twenty-first century". Based on this broad charter of evaluating sea bases, an examination of the floating ocean platform concept was included in the study. The floating ocean platform is a generic description of a large, relatively stationary

It was based on technical analyses, literature reviews and surveys, and discussions/visits with the main groups and organizations involved in developing the floating ocean platform. All discussion material was unclassified, as are the contents of this report. All the external inputs and discussions, too numerous to mention, made this report possible, and are greatly appreciated. The first part of this report is the summary narrative that was submitted by the author to the Technology Group of the study. The second part is the viewgraphs that were presented to the Technology Group by the author on 12 February 1991. The third part is a selected bibliography of studies on the floating ocean platform over the past two decades, with over three thousand references identified.
