This book provides a review of thermal ice drilling technologies, including the design, parameters, and performance of various tools and drills for making holes in ice sheets, ice caps, mountain glaciers, ice shelves, and sea ice. In recent years, interest in thermal drilling technology has increased as a result of subglacial lake explorations and extraterrestrial investigations. The book focuses on the latest ice drilling technologies, but also discusses the historical development of ice drilling tools and devices over the last 100 years to offer valuable insights into what is possible and what not to do in the future. Featuring numerous figures and pictures, many of them published for the first time, it is intended for specialists working in ice-core sciences, polar oceanography, drilling engineers and glaciologists, and is also a useful reference for researchers and graduate students working in engineering and cold-regions technology.

This time, Margot from Castillon wins a travel grant for excelling in the Roman history exam. The randomly picked destination is Via Belgica, a 450-km Roman road (50 BC) stretching from France to Germany - through Belgium and The Netherlands. Written to inform rather to impress, the heavily illustrated "Via Belgica" with its surrealistic personages on the real background adds another adventure to "Margot on a Roman Road" series, along with "Via Aurelia," "Via Claudia-Augusta," " Via Domitia," "Via Fossa," "Via Maris" and "Via Militaris." Where you still are unable to find the destination of your heart, the other 80+ travel diaries from this author may offer a pleasant remedy.
