From the Introduction: Consider these two places: Walking into Green Acres, you immediately sense that you have entered an oasis-traffic noise left behind, negative urban distractions out of sight, children playing and running on the grass, adults puttering on plant-filled balconies. Signs of life and care for the environment abound. Innumerable social and physical clues communicate to visitors and residents alike a sense of home and neighborhood. This is a place that people are proud of, a place that children will remember in later years with nostalgia and affection, a place that just feels "good." Contrast this with Southside Village. Something does not feel quite right. It is hard to find your way about, to discern which are the fronts and which are the backs of the houses, to determine what is "inside" and what is "outside." Strangers cut across what might be a communal backyard. There are no signs of personalization around doors or on balconies. Few children are around; those who are outside ride their bikes in circles in the parking lot. There are few signs of caring; litter, graffiti, and broken light fixtures indicate the opposite. There is no sense of place; it is somewhere to move away from, not somewhere to remember with pride. These are not real locations, but we have all seen places like them. The purpose of this book is to assist in the creation of more places like Green Acres and to aid in the rehabilitation of the many Southside Villages that scar our cities. This book is a collection of guidelines for the site design of low-rise, high-density family housing. It is

intended as a reference tool, primarily for housing designers and planners, but also for developers, housing authorities, citizens' groups, and tenants' organizations--anyone involved in planning or rehabilitating housing. It provides guidelines for the layout of buildings, open spaces, community facilities, play areas, walkways, and the myriad components that make up a housing site.

This book is a collection of guidelines for the site design of low-rise, high-density family housing. It is intended as a reference tool, primarily for housing designers and planners, but also for developers, housing authorities, citizens' groups, and tenants organizations--anyone involved in planning or rehabilitating housing. It provides guidelines for the layout of buildings, open spaces, community facilities, play areas, walk ways, and the myriad components that make up a housing site.

House as a Mirror of Self presents an unprecedented examination of our relationship to where we live, interwoven with compelling personal stories of the search for a place for the soul. Marcus takes us on a reverie of the special places of childhood--the forts we made and secret hiding places we had--to growing up and expressing ourselves in the homes of adulthood. She explores how the self-image is reflected in our homes/ power struggles in making a home together with a partner/ territory, control, and privacy at home/ self-image and location/ disruptions in the boding with home/ and beyond the "house as ego" to the call of the soul. As

our culture is swept up in home improvement to the extent of having an entire TV network devoted to it, this book is essential for understanding why the surroundings that we call home make us feel the way we do. With this information we can embark on home improvement that truly makes room for our soul.

people places Second Edition Design Guidelines for Urban Open Space edited by Clare Cooper Marcus and Carolyn Francis A resurgence in the use of public space continues throughout North America and many other parts of the world. Neighborhoods have become more outspoken in their demands for appropriate park designs; corporations have witnessed the value of providing outdoor spaces for employee lunch-hour use; the rising demand for child care has prompted increased awareness of the importance of developmentally appropriate play and learning environments; and increased attention is being focused on the specific outdoor space needs for the elderly, college students, and hospital patients and staff. Now available in an updated, expanded second edition, People Places is a fully illustrated, award-winning book that offers research-based guidelines and recommendations for creating more usable and enjoyable public open spaces of all kinds. People Places analyzes and summarizes existing research on how urban open spaces are actually used, offering design professionals and students alike an easily understood, easily applied guide to creating people-friendly places. Seven types of urban open space are discussed: urban plazas, neighborhood parks, miniparks and vest-pocket parks, campus outdoor spaces, outdoor spaces in housing for the elderly, child-care outdoor spaces, and hospital outdoor spaces. People Places contains a chapter-by-chapter review of the literature, illustrative case studies, and design

Download Free Housing As If People Mattered Site Design Guidelines For Medium Density Family Housing California Series

guidelines specific to each type of space. People Places has a number of features that can be easily incorporated into the design process: * Clear, readable translations of existing research on people's use of outdoor spaces. * Performance-based design recommendations that specify key relationships between design and use. * Design review checklists that help readers plan and critique designs. * A clearly organized, concise format equally useful to the design practitioner and the design student. The newly revised edition of People Places also includes: * Discussion of accessibility issues, including ADA regulations and the concept of universal design; and of design responses aimed at crime reduction. * Procedures for conducting post-occupancy evaluations of designed outdoor spaces. * Updated and new information on each type of outdoor space, with special attention to hospitals, child care facilities, and campus outdoor spaces where specific advances have occurred since 1990. * A completely new color-photo section and 50 new black and white illustrations. Winner of the Merit Award in Communication from the American Society of Landscape Architects, People Places is an essential working tool for landscape architects and architects, city planners, urban designers, neighborhood groups, and anyone else concerned with the quality of urban open space.

This comprehensive and authoritative guide offers an evidence-based overview of healing gardens and therapeutic landscapes from planning to post-occupancy evaluation. It provides general guidelines for designers and other stakeholders in a variety of projects, as well as patient-specific guidelines covering twelve categories ranging from burn patients, psychiatric patients, to hospice and Alzheimer's patients, among others. Sections on participatory design and funding offer valuable guidance to the entire team, not just designers, while a planting and

Maintenance Chapter gives critical information to ensure that safety, longevity, and budgetary concerns are addressed.

Although the healing qualities of nature have been recognized and relied on for centuries as a valuable part of convalescence, recent history has seen nature's therapeutic role virtually eclipsed by the technological dominance of modern medicine. As the twentieth century comes to a close and the medical community reacknowledges the importance of the environment to recovery, the healing garden is emerging as a supplement to drug- or technology-based treatments. Healing Gardens celebrates this renewed interest in nature as a catalyst for healing and renewal by examining the different therapeutic benefits of healing gardens and offering essential design guidance from experts in the field. Unique and comprehensive, Healing Gardens provides up-to-date coverage of research findings, relevant design principles and approaches, and best practice examples of different types of healing gardens. It begins by exploring what current research reveals about the connection between nature, human stress reduction, and medical outcomes. It then presents case studies and design guidelines for outdoor spaces in medical settings that include general, psychiatric, and children's hospitals as well as hospices, nursing homes, and Alzheimer's facilities. Historical information, literature reviews, and studies on use are included for each type of outdoor space covered, offering important insights into what works in healing gardens-and what doesn't. Generously supplemented with photographs, site plans, anecdotes, and more, Healing Gardens is an invaluable practical guide for landscape architects and others involved in creating and maintaining medical facilities, and an extremely useful reference for those responsible for

Download Free Housing As If People Mattered Site Design Guidelines For Medium Density Family Housing California Series

patient care. A unique and comprehensive look at the therapeutic effects and design of healing gardens For more and more people, the shortest road to recovery is the one that leads through a healing garden. Combining up-to-date information on the therapeutic benefits of healing gardens with practical design guidance from leading experts in the field, Healing Gardens is an important resource for landscape architects and others working in this emerging area. With the help of site plans, photographs, and more, it presents design guidelines and case studies for outdoor spaces in a range of medical settings, including: * Acute care general hospitals. * Psychiatric hospitals. * Children's hospitals. * Nursing homes. * Alzheimer's facilities. * Hospices.

Architecture has attracted increasing worldwide attention in recent years, not only because of its cultural significance but also because of concern over the performance and resource implications of buildings. 101 in-depth articles by international scholars and practitioners bring the subject into focus by examining issues from various viewpoints. Please contact your representative for a leaflet detailing full contents and contributors. It also includes sample pages and several illustrations from the book.

Summary: "Creative Community Planning provides clear access to emerging innovations in artistic, narrative, embodied and technological methods, exploring the frontiers of community engagement within a fresh sustainability framework. Academics, professionals and community members increasingly acknowledge that multiple perspectives enrich planning outcomes. Furthermore, it's acknowledged that the engagement process itself can create imaginative

Download Free Housing As If People Mattered Site Design Guidelines For Medium Density Family Housing California Series

forums and spaces to nurture understanding and empathy for ourselves and for our environments. Reflecting on the wide continuum of participatory practice, the authors of Creative Community Planning discuss the work of planning theorists, researchers and practitioners engaging a diversity of people living in ever changing communities. The authors discuss how engagement practices are enhanced using practices such as visioning and participatory research processes, poetry, theatre, film, websites and exercises to access the creative ideas of all ages, including children and young people."--Publisher description.
