The most comprehensive and up-to-date guide to the technologies, applications and human factors considerations of Augmented Reality (AR) and Virtual Reality (VR) systems and wearable computing devices. Practical Augmented Reality is ideal for practitioners and students concerned with any application, from gaming to medicine. It brings together comprehensive coverage of both theory and practice, emphasizing leading-edge displays, sensors, and DIY tools that are already available commercially or will be soon. Beginning with a Foreword by NASA research scientist Victor Luo, this guide begins by explaining the mechanics of human sight, hearing and touch, showing how these perceptual mechanisms (and their performance ranges) directly dictate the design and use of wearable displays, 3-D audio systems, and tactile/force feedback devices. Steve Aukstakalnis presents revealing case studies of real-world applications from gaming, entertainment, science, engineering, aeronautics and aerospace, defense, medicine, telerobotics, architecture, law enforcement, and geophysics. Readers will find clear, easy-to-understand explanations, photos, and illustrations of devices including the Atheer AIR, HTC Vive, DAQRI Smart Helmet, Oculus (Facebook) CV1, Sony PlayStation VR, Vuzix M300, Google Glass, and many more. Functional diagrams and photographs clearly explain how these devices operate, and link directly to relevant theoretical and practical content. Practical Augmented Reality thoroughly considers the human factors of these systems, including sensory and motor physiology constraints, monocular and binocular depth cues, elements contributing to visually-induced motion sickness and nausea, and vergence–accommodation conflicts. It concludes by assessing both the legal and societal implications of new and emerging AR, VR, and wearable technologies as well as provides a look next generation systems.

A designer’s deep dive into seven science fiction films, filled with “gloriously esoteric nerdery [and] observations as witty as they are keen” (Wired). In Typeset in the Future, blogger and designer Dave Addey invites sci-fi movie fans on a journey through seven genre-defining classics, discovering how they create compelling visions of the future through typography and design. The book delves deep into 2001: A Space Odyssey, Star Trek: The Motion Picture, Alien, Blade Runner, Total Recall, WALL-E, and Moon, studying the design tricks and inspirations that make each film transcend mere celluloid and become a believable reality. These studies are illustrated by film stills, concept art, type specimens, and ephemera, plus original interviews with Mike Okuda (Star Trek), Paul Verhoeven (Total Recall), and Ralph Eggleston and Craig Foster (Pixar). Typeset in the Future is an obsessively geeky study of how classic sci-fi movies draw us in to their imagined worlds.

In the vein of Naomi Novik’s New York Times bestseller Spinning Silver and Katherine Arden’s national bestseller The Bear and the Nightingale, this unforgettable debut—inspired by Hungarian history and Jewish mythology—follows a young pagan woman with hidden powers and a one-eyed captain of the Woodsmen as they form an unlikely alliance to thwart a tyrant. In her forest-veiled pagan village, Évike is the only woman without power, making her an outcast clearly abandoned by the gods. The villagers blame her corrupted bloodline—her father was a Yehuli man, one of the much-loathed servants of the fanatical king. When soldiers arrive from the Holy Order of Woodsmen to claim a pagan girl for the king’s blood sacrifice, Évike is betrayed by her fellow villagers and surrendered. But when monsters attack the Woodsmen and their captive en route, slaughtering everyone but Évike and the cold, one-eyed captain, they have no choice but to rely on each other. Except he’s no ordinary Woodsmen—he’s the disgraced prince, Gáspár Bárány, whose father needs pagan magic to consolidate his power. Gáspár fears that his cruelly zealous brother plans to seize the throne and instigate a violent reign that would damn the pagans and the Yehuli alike. As the son of a reviled foreign queen, Gáspár understands what it’s like to be an outcast, and he and Évike make a tenuous pact to stop his brother. As their mission takes them from the bitter northern tundra to the smog-choked capital, their mutual loathing slowly turns to affection, bound by a shared history of alienation and oppression. However, trust can easily turn to betrayal, and as Évike reconnects with her estranged father and discovers her own hidden magic, she and Gáspár need to decide whose side they’re on, and what they’re willing to give up for a nation that never cared for them at all.
