Cardinal Education is an educational consulting and tutoring company based in Palo Alto, CA. Guided by a philosophy of fulfilling students' academic potential in a way that boosts skills and confidence for life, we work to maximize successful middle school, high school, and college admissions outcomes. While some of our methods defy "conventional wisdom," we have a proven track record with a broad range of students: the Ivy League bound to those wishing to

avoid community college, the self-motivated to the intransigently jaded, and the profoundly gifted to learning disabled. We have a passion for expanding students' dreams and helping them attain their goals. Cardinal Education believes in the social value of a strong public education system and sponsors pro bono programs to bring private sector expertise to bear. However, government fiscal policies are shortchanging public schools of opportunities: activities, sports, variety of classes, advanced classes, student: teacher ratios, and counseling departments. The "private school imperative" means that despite economic trends, admission to private school is becoming so

competitive that it necessitates standardized testing excellence. The philosophy of this math workbook is rigor and drill. Because this is the first test students take that actively tries to trick students at every turn, students who sit for these standardized exams need reflexive familiarity with computation (math facts), problem types, and strategy. The entrance exams are the first standardized tests for which budgeting time is a significant issue. Students need to spend the majority of time on analysis to avoid getting tricked rather than computation. By building skills, speed, and confidence, we hope to eliminate anxiety and give students a solid foundation on

which to build excellent scores. This book is intended as a supplement for our highly trained staff, so it does not include strategies. However, motivated students can use it successfully with occasional help from a teacher or parent. Each chapter is comprised of units, with each unit comprised of 4 problem sets of difficulty, increasing in a logically progressive manner. Students should do as many of the 4 problem sets for each unit as it takes to achieve a 90% accuracy rate. Students taking lower level exams should complete problems 1-10 in each set. Students competing for high school admissions should complete each problem set in its entirety. Questions or feedback:

Eleven short stories of the Cuban immigrant experience as characters adjust to life in the United States, from an award-winning author. From the prize-winning title story—a masterpiece of humor and heartbreak—unfolds a collection of tales that illuminate the landscape of an exiled community rich in heritage, memory, and longing for the past. In *Cuba I Was a German Shepherd* is at once “tender and sharp-fanged” as Ana Menéndez evocatively charts the territory from Havana to Coral Gables, Florida, and explores whether any of us are

capable, or even truly desirous, of outrunning our origins (LA Weekly). "With the grace of Margaret Atwood and the sensuality of Laura Esquivel," Menéndez makes an unforgettable debut "rich in metaphor, wisdom, and delicious subtlety" (St. Petersburg Times).

Alison Goodman's first novel - in a very special new edition!
Seventeen-year-old Joss is a rebel, and a student of time travel at the prestigious Centre for Neo-Historical Studies. This year, for the first time, the Centre has an alien student: Mavkel, from the planet Choria. And Mavkel has chosen Joss, of all people, as his

roommate and study partner. Then Mavkel gets sick. Joss quickly realizes that his will to live is draining away. The only way she can help Mavkel is by breaking the Centre's strictest rules - and that means going back in time to change history. This new Firebird edition of Alison Goodman's acclaimed first genre-bending adventure features a short story about Joss and Mav's after-book adventures, originally published in *Firebirds Rising*.

Previous efforts at legal development have focused almost exclusively on state legal systems, many of which have shown little improvement over time. Recently, organizations engaged in legal development

activities have begun to pay greater attention to the implications of local, informal, indigenous, religious and village courts or tribunals, which often are more efficacious than state legal institutions, especially in rural communities. Legal pluralism is the term applied to these situations because these institutions exist alongside official state legal systems, usually in a complex or uncertain relationship. Although academics, especially legal anthropologists and sociologists, have discussed legal pluralism for decades, their work has not been consulted in the development context. This book brings together, in a single volume, contributions from academics and practitioners to

Tess Laurelton, PhD, likes things wild and unexpected. She's curvy, smart and not the kind of woman to let life stand in the way of adventure. Her career as a well-respected grizzly bear expert should have given her plenty of adventure, but instead, she's camped up inside a research lab. When she is given the opportunity to find out why the grizzly population at Cabinet Mountains in Montana is suddenly booming, she jumps at the chance. What she doesn't know is that the innocent trip will be a lot more primal and untamed than she could have ever imagined. Jackson Arder might be known as

a reserved forest ranger, but he is first and foremost the powerful Alpha of a prominent werebear clan. His clan has come under attack by a man he thought of as his brother, Ryder Hunt, throwing his life in turmoil. When Tess shows up on Jackson's doorstep, looking like a sassy, curvy treat made just for him, Jackson knows life is about to get a lot more heated than he was prepared for. How can a bear wage war when all he wants to do is claim the sexy, whip-smart woman who strolled into his world as if she belonged there? As danger surrounds them, Jackson finds himself falling fast and hard for Tess. But with war at his door, can he give his heart to someone who doesn't know about his true

nature? Can Tess love both the man and the bear or will she run for the hills when she finds out the truth?

The Faber Book of Beasts is a collection of many of the best poems in English about the creatures who share our planet. The animal kingdom has prompted some of the liveliest and most enjoyable writing by poets, from Homer to our contemporaries. Among the creatures gathered here, tame or wild; common or exotic, are mammals, reptiles, birds, insects, and others perhaps more fanciful than real. A zoologist's delight. There is, too, a moral or philosophical purpose. As Paul Muldoon says in his introduction:

'We are most human in the presence of animals.' And it is just this sense of how our humanity is illuminated by the contemplation of bestial life that he has set out to celebrate. The results are wonderfully rich and thought-provoking.
