In a dynamic world, the role of HR is central in tapping the vast potential of human capital, and interestingly, blending it with automation and digitization in unique ways. HR analytics is pivotal in identifying, measuring and articulating the objectives and outcomes of different programs. What if you can:

- Predict which high performers were at risk of leaving six months before they walked out the door?
- Merge external data with your own business metrics to project workforce demand six, nine or even eighteen months from now?
- Triage incoming resumes overnight to
