engineering, and is an indispensable
reference for professional industrial
engineers and managers. In his
outstanding book, Professor
Katsundo Hitomi integrates three key
themes into the text: * manufacturing
technology * production
management * industrial economics

Get Free Industrial Engineering And

Manufacturing Management By
Manojan
Production technology is concerned with the flow of materials from the acquisition of raw materials, through conversion in the workshop to the shipping of finished goods to the customer. Production management deals with the flow of information, by which the flow of

Get Free Industrial Engineering And Production Management By
Materials is managed efficiently, through planning and control techniques. Industrial economics focuses on the flow of production costs, aiming to minimise these to facilitate competitive pricing. Professor Hitomi argues that the fundamental purpose of

Get Free Industrial Engineering And Production Management By Manojan

manufacturing is to create tangible goods, and it has a tradition dating back to the prehistoric toolmakers. The fundamental importance of manufacturing is that it facilitates basic existence, it creates wealth, and it contributes to human happiness - manufacturing matters. Nowadays

Get Free Industrial
Engineering And
Production Management By
MahaJan

we regard manufacturing as operating in these other contexts, beyond the technological. It is in this unique synthesis that Professor Hitomi's study constitutes a new discipline: manufacturing systems engineering - a system that will promote manufacturing excellence.
