In recent years, numerous incidents of corporate fraud have been reported in Japan. These have occurred at a number of world-famous Japanese companies, including Toshiba, Olympus, and Kobe Steel, among others. Needless to say, these companies already had a risk management system in place; the problem here is why these systems didn't function. On this issue, this book investigates eight incidents of corporate fraud in Japanese corporations, based on third-party investigation reports. It explores common problems in corporate governance and internal control systems present in these incidents, and discusses why these companies' three lines of defense let them down. These observations are valuable for readers worldwide who study corporate governance, risk management, and business management.

The first edition of The Internal Auditing Handbook received wide acclaim from readers and became established as one of the definitive publications on internal auditing. The second edition was released soon after to reflect the rapid progress of the internal audit profession. There have been a number of significant changes in the practice of internal auditing since publication of the second edition and this revised third edition reflects those changes. The third edition of The Internal Auditing Handbook retains all the detailed material that formed the basis of the second edition and has been updated to reflect the Institute of Internal Auditor's (IIA) International Standards for the Professional Practice of Internal Auditing. Each chapter has a section on new developments to reflect changes that have occurred over the last few years. The key role of auditors in reviewing corporate governance and risk management is discussed in conjunction with the elevation of the status of the chief audit executive and heightened expectations from boards and audit committees. Another new feature is a series of multi-choice questions that have been developed and included at the end of each chapter. This edition of The Internal Auditing Handbook will prove to be an indispensable reference for both new and experienced auditors, as well as business managers, members of audit committees, control and compliance teams, and all those who may have an interest in promoting corporate governance.

The Pinnacle of Power, first book in the Keeper of the Balance Trilogy, combines all of the classic elements of epic fantasy and sci-fi with a little touch of political intrigue mystery, suspense, espionage and romance.

Human Feelings provides a comprehensive overview of the role of emotions in human life. Growing out of the research and writing of members of the Harvard Affect Study Group, the volume brings to bear different disciplinary outlooks and different modes of inquiry on various aspects of human affective experience. The book opens with a section of "Theoretical Considerations" that includes an overview of affective development across the life cycle, an examination of affect and character, and an empirical analysis of gender differences in the expression of emotion. A series of clinical reports involving patients in different age groups comprises the next section, "Affect and the Life Cycle." Subsequent sections on "Trauma, Addiction, and Psychosomatics" and "Transformations of Affect" traverse the realms of neurobiology, addictive suffering, stress disorders, epistemology, creativity, and social organization. A final section, "New Directions," further extends the frontiers of inquiry into nonordinary states of consciousness and the vicissitudes of well-being. An integrative collection of multidisciplinary sweep and scholarly integrity, Human Feelings is a readable source book that brings together rigorous theoretical and developmental studies, experientially vivid self-reporting, and a wealth of illustrative clinical material. An invaluable addition to the libraries of mental health professionals and developmental researchers, this volume will be illuminating for philosophers, social and political scientists, and lay readers as well.

This book addresses the rising productivity gap between the global frontier and other firms, and identifies a number of structural impediments constraining business start-ups, knowledge diffusion and resource allocation (such as barriers to up-scaling and relatively high rates of skill mismatch).

"Includes coverage of international standards and global auditing issues, in addition to coverage of PCAOB Auditing Standards, the risk assessment SASs, the Sarbanes/Oxley Act, and Section 404 audits."
