International Accounting can be viewed in terms of accounting issues uniquely confronted by companies involved in international business. It also can be viewed more broadly as the study of how accounting is practiced in each and every country around the world, learning about and comparing the differences in various accounting methods. This is unique in its content and is up-to-date with relevant material integrated throughout the textbook. In its first year, this text captured approximately 30 percent of the market.

This research monograph critically examines convergence of financial reporting in Germany by taking into account the influence of political, social and economic factors on accounting. This study makes an original and significant contribution by examining issues and biases in the convergence process that may challenge the assumption of superiority,
