International Handbook of Dialogic Education

Acknowledging and understanding spiritual formation is vital in contemporary education. This book explores the dynamic relationship between education and wellbeing. It examines the theory underpinning the practice of education in different societies where spirituality and care are believed to be at the heart of all educational experiences. The book recognizes that, regardless of the context or type of educational experience, education is a caring activity in which the development of the whole person - body, mind and spirit - is a central aim for teachers and educators in both formal and informal learning. The chapters in this handbook present and discuss topics that focus on spirituality as an integral part of human experience and, consequently, essential to educational programs which aim to address personal and communal identity, foster resilience, empathy and compassion, and promote meaning and connectedness.

This state-of-the-art, comprehensive Handbook is the first of its kind to fully explore the interconnections between social justice and education for citizenship on an international scale. Various educational policies and practices are predicated on notions of social justice, yet each of these are explicitly or implicitly shaped by, and in turn themselves shape, particular notions of citizenship/education for citizenship. Showcasing current research and theories from a diverse range of perspectives and including chapters from internationally renowned scholars, this Handbook seeks to examine the philosophical, psychological, social, political, and cultural backgrounds, factors and contexts that are constitutive of contemporary research on education for citizenship and social justice and aims to analyse the transformative role of education regarding social justice issues. Split into two sections, the first contains chapters that explore central issues relating to social justice and their interconnections to education for citizenship whilst the second contains chapters that explore issues of education for citizenship and social justice within the contexts of particular nations from around the world. Global in its perspective and definitive in content, this one-stop volume will be an indispensable reference resource for a wide range of academics, students and researchers in the fields of Education, Sociology, Social Policy, Citizenship Studies and Political Science.

This six-volume handbook covers the latest practice in technical and vocational education and training (TVET). It presents TVET models from all over the world, reflections on the best and most innovative practice, and dozens of telling case studies. The handbook presents the work of established as well as the most promising young researchers and features unrivalled coverage of developments in research, policy and practice in TVET.

The International Handbook of Science Education is a two volume edition pertaining to the most significant issues in science education. It is a follow-up to the first Handbook, published in 1998, which is seen as the most authoritative resource ever produced in science education. The chapters in this edition are reviews of research in science education and retain the strong international flavor of the project. It covers the diverse theories and methods that have been a foundation for science education and continue to characterize this field. Each section contains a lead chapter that provides an overview and synthesis of the field and related chapters that provide a narrower focus on research and current thinking on the key issues in that field. Leading researchers from around the world have participated as authors and consultants to produce a resource that is comprehensive, detailed and up to date. The chapters provide the most recent and advanced thinking in science education making the Handbook again the most authoritative resource in science education.

The International Handbook of Jewish Education, a two volume publication, brings together scholars and practitioners engaged in the field of Jewish Education and its cognate fields world-wide. Their submissions make a significant contribution to our knowledge of the field of Jewish Education as we start the second decade of the 21st century. The Handbook is divided broadly into four main sections: Vision and Practice: focusing on issues of philosophy, identity and planning—the big issues of Jewish Education. Teaching and Learning: focusing on areas of curriculum and engagement Applications, focusing on the ways that Jewish Education is transmitted in particular contexts, both formal and informal, for children and adults. Geographical, focusing on historical, demographic, social and other issues that are specific to a region or where an issue or range of issues can be compared and contrasted between two or more locations. This comprehensive collection of articles providing high quality content, constitutes a definitive statement on the state of Jewish Education world wide, as well as through a wide variety of lenses and contexts. It is written in a style that is accessible to a global community of academics and professionals.

The Handbook of Educational Policy provides a comprehensive overview of policy questions in education reform at local, state, and national levels. The book raises controversial questions, such as who really benefits from educational reform, and investigates issues of accountability, assessment, educational fads, technology in education, and other matters of educational policy. The book explores not only what education is, but what it can be and should be, providing a scholarly analysis of policy decisions as well as practical recommendations for parents, teachers, and policy-makers. Key Features \* Provides informed discussion based on scholarly research \* Contains practical recommendations for parents, educators, and policy-makers \* Includes representation from local, state, and national levels \* Considers comparisons of United States practices to reforms abroad \* Addresses current issues and implications for the futures

The universality of the problematics with urban education, together with the importance of understanding the context of improvement interventions, brings into sharp focus the importance of an undertaking like the International Handbook of Urban Education. An important focus of this book is the interrogation of both the social and political factors that lead to different problem posing and subsequent solutions within each region.

This title provides a comprehensive analysis of the relationship between power, knowledge, education, and schooling.

Distance education is arguably one of the major developments in education during the 20th Century. This title explores the array of distance education theories and practices as they have been shaped by the late-20th Century and then positions these in terms of the contemporary circumstances of the 21st Century.

Nina Bascia, Alistar Cumming, Amanda Datnow, Kenneth Leithwood and David Livingstone This Handbook presents contemporary and emergent trends in educational policy research, in over 70ty chapters written by nearly ninety leading researchers from a number of countries. It is organized into 7ve broad sections which capture many of the current dominant educational policy foci and at the same time situate current understandings historically, in terms of both how they are conceptualized and in terms of past policy practice. The chapters themselves are empirically grounded, providing illustrations of the conceptual implications c- tained within them as well as allowing for comparisons across them. The se- re7exivity within chapters with respect to jurisdictional particularities and c- trasts allows readers to consider not only a range of approaches to policy analysis but also the ways in which policies and policy ideas play out in different times and places. The sections move from a focus on prevailing policy tendencies through increasingly critical and ' ' outsider ' ' perspectives on policy. They address, in turn, the contemporary strategic emphasis on large-scale reform; substantive emphases at several levels – on leadership and governance, improving teacher quality and conceptualizing learning in various domains around the notion of literacies and concluding, 7nally, with a contrasting topic, workplace learning, which has had less policy attention and thus allows readers to consider both the advantages and disadvantages of learning and teaching under the bright gaze of policy.
