Plane crashes... by the hundreds. This was not a safe business. There was nothing to copy, no one to learn from. Nobody knew about metal fatigue and G forces. Nobody knew what damage hail could do to an airplane flying at 120 mph. Nobody knew what turbulence could do to an airplane. Nobody knew icing would kill the lift on wings. There were no gyro's, no instruments, no navigation facilities, no beacons, no rules, no regulations, no aircraft standards and no airports in the early

days. Just young men and their flying machines that would bet their lives to pioneer a mega billion dollar industry.

The updated 11th edition of the Aeronautical Chart User's Guide by the FAA is a great reference for novice pilots and professionals alike. Printed in full color with detailed examples, this book provides all the information students and pilots need to know about all the symbols and information provided on US aeronautical charts and chart navigation publications. Readers will find information on VFR charts, aeronautical chart symbols, helicopter route charts, flyway planning charts, IFR enroute charts, explanation of IFR enroute terms and symbols, Terminal Procedure Publications (TPPs), explanation of TPP terms and symbols, airspace classifications, and an airspace class table.

Ground study material for European pilot's written exams - aeroplanes & helicopter.
