(Also an example of a girl that struggled with health issues and still lived to the fullest). I'll be gifting this book to my child's teacher soon!

Joan Procter, Dragon Doctor: The Woman Who Loved Reptiles ...

It stated that Joan Beauchamp Procter was the first person to describe Komodo dragons in captivity in the 1920s. Nothing more about her. Of course, my curiosity was piqued for several reasons: first, women barely had the right to vote in the 1920s; second, women scientists were rare at that time; and third, anyone working with Komodo dragons when the world knew little about them had to be interesting!

Forgotten women: meet Joan Procter, the amazing dragon doctor

There, just like when she was a little girl, Joan hosted children's tea parties - with her komodo dragon as the guest of honour. With a lively text and vibrant illustrations, scientist and writer Patricia Valdez and illustrator Felicita Sala bring to life Joan Procter's inspiring story of passion and determination.

Summer BookDay Day 34 - Joan Procter, Dragon Doctor

Joan Beauchamp Procter FZS FLS was a notable British zoologist, internationally recognised as an outstanding herpetologist. She worked initially at the British Museum and later for the Zoological Society of London, as the first female Curator of Reptiles at London Zoo. Her short life was afflicted by chronic ill-health, but she undertook substantial taxonomic work and made significant innovative contributions to veterinary practice and zoo displays. She also wrote scientific and popular zoologic

Joan Procter, Dragon Doctor is my favorite non-fiction kids book of all time! An extremely well written and beautifully illustrated account of a girl that wasn't like the rest. (Also an example of a girl that struggled with health issues and still lived to the fullest).

Joan Procter, Dragon Doctor: The Woman Who Loved Reptiles ...

Joan Procter, Dragon Doctor. Author: Patricia Valdez Illustrator: Felicita Sala. Publisher: Andersen Press. Back in the days of long skirts and afternoon teas, the young Joan Procter preferred playing with her lizard and snake pets to the games that were expected from a girl in the early 1900s. Unable to attend much school because of illness, Joan nevertheless was very bright, and fascinated with reptiles.

Joan Procter, Dragon Doctor | BookTrust

Felicita Sala, the illustrator of both Joan Procter, Dragon Doctor and Mr. Crum's Potato Predicament is self-taught. After falling in love with illustration in 2005, she committed herself to mastering the craft -- and her career took off! We asked her about the process for illustrating these two books, and here's what she had to say:

For fans of Ada Twist: Scientist comes a fascinating picture book biography of a pioneering female scientist--who loved reptiles! Back in the days of long skirts and afternoon teas, young Joan Procter entertained the most unusual party guests: slithery and scaly ones, who turned over teacups and crawled past the crumpets.... While other girls played with dolls, Joan preferred the company of reptiles. She carried her favorite lizard with her everywhere--she even brought a crocodile to school! When Joan grew older, she became the Curator of Reptiles at the British Museum. She went on to design the Reptile House at the London Zoo, including a home for the rumored-to-be-vicious komodo dragons. There, just like when she was a little girl, Joan hosted children's tea parties--with her komodo dragon as the guest of honor. With a lively text and vibrant illustrations, scientist and writer Patricia Valdez and illustrator Felicita Sala bring to life Joan Procter's inspiring story of passion and determination. A Chicago Public Library Best Book of the Year selection

A picture-book biography of the early 20th-century woman who became the Curator of Reptiles at the British Museum and went on to design the Reptile House at the London Zoo.

A mouthwatering tale of invention. When a persnickety customer named Filbert P. Horsefeathers complains that George Crum's fried potatoes are too thick, George makes them thinner. When Filbert insists they are still too thick, George makes them even thinner. But when the plate is sent back a third time, George mischievously decides to use his sharpest knife to cut paper-thin potato slices, which he fries until they are crackling and douses liberally with salt. At last, Filbert is satisfied, proclaiming, "Perfection! Which they are. Because, quite by accident, George has invented potato chips! Based on true events, this delicious tale will have kids clamoring for more, more, more!

Against the backdrop of a beautiful Hawaiian landscape, a young girl cuddles and sleeps in her mother's lap.

Not all princesses are made of sugar and spice--some are made of funnier, fiercer stuff! Princess Amanita laughs in the face of danger. Brakeless bicycles, pet scorpions, spiky plants--that's her thing. So when quiet Prince Florian gives her roses, Amanita is unimpressed. . . until she sees their glorious thorns! Now she must have rose seeds of her own. But when huge, honking noses grow instead, what is a princess with a taste for danger to do? For readers seeking a princess with pluck comes an independent heroine who tackles obstacles with a bouquet of sniffing noses. At once lovely and delightfully absurd, here's a story to show how elastic ideas of beauty and princesses can be.

A picnic, a beach, a pie cut into pieces and shared with good friends. Pie is for sharing. It starts off round, and you can slice it into as many pieces as you want. What else can be shared? A ball, of course. A tree? What about time? Through the course of one memorable Fourth of July picnic, Stephanie Ledyard and Jason Chin take young readers through the ups and downs of sharing in this lovely picture book.

Discover new realms of outer space in this picture book biography of scientist Gabriela Gonzalez, who immigrated to America and became a ground-breaking scientist. Written by a molecular biologist and illustrated by an award-winning artist, this stunning picture book explores science, space, and history. In 1916, Albert Einstein had a theory. He thought that somewhere out in the universe, there were collisions in space. These collisions could cause little sound waves in the fabric of space-time that might carry many secrets of the distant universe. But it was only a theory. He could not prove it in his lifetime. Many years later, an immigrant scientist named Gabriela Gonzalez asked the same questions. Armed with modern technology, she joined a team of physicists who set out to prove Einstein's theory. At first, there was nothing. But then... they heard a sound. Gabriela and her team examined, and measured, and re-measured until they were sure. Completing the work that Albert Einstein had begun 100 years earlier, Gonzalez broke ground for new space-time research. In a fascinating picture book that covers 100 years, 2 pioneering scientists, and 1 trailblazing discovery, Patricia Valdez sheds light on a little known but extraordinary story.

Illustrations and rhyming text introduce Macy, whose conduct and bearing point to a kinder world where differences are celebrated and embraced.

In the first installment of the Dragon Safety Series, a dragon's flame-filled tea party turns into a rhyming and reassuring lesson in fire safety.
