Discussion of types of machinery and tools needed on a modern farm.

A thought-provoking collection of essays on Buddhist ethics by some of the leading thinkers in the field. The reader is provided with engaging explorations of central issues in Buddhist ethics, insightful analyses of the ways Buddhist ethical principles are being applied today in both Asian and Western countries, and groundbreaking proposals about how Buddhist perspectives might inform debates on some of the core ethical issues of the modern world, including consumerism, globalization, environmental problems, war, ethnic conflict, and inter-religious tensions. The leading figure in identifying the field of Buddhist ethics and articulating some of its core issues is Professor Damien Keown of the University of London. This book brings together a group of eminent scholars who have all been influenced by Keown's work and who are also friends and close colleagues. The result is a wonderful volume for those who are struggling with practical issues of ethical concern. This will be a valuable resource in the study of ethics for years to come.

A tractor repair manual written for the experienced mechanic by professionals in an easy-to-use format , including numerous photos, illustrations and exploded views.

This introduction to organic chemistry includes the currently controversial issue of halogenated organic compounds in the environment, and presents the concept of environmentally benign synthesis, as well as exploring molecular modelling.
