International Symposium on Business Modeling and Software Design (BMSD 2013), held in Noordwijkerhout, The Netherlands, during July 8-10, 2013. The symposium was organized and sponsored by the Interdisciplinary Institute for Collaboration and Research on Enterprise Systems and Technology (IICREST), in cooperation with the Dutch Research School for Information and Knowledge Systems (SIKS), the Center for Telematics and Information Technology (CTIT), Aristotle University of Thessaloniki (AUTH), and AMAKOTA Ltd. The theme of BMSD 2013 was "Enterprise Engineering and Software Generation." The 13 full and 20 short papers presented at BMSD 2013 were selected from 56 submissions. The eight papers published in this book were carefully reviewed and selected from the 13 full papers. The selection includes papers touching upon a large number of research topics, ranging from more conceptual ones, such as modeling landscapes, process modeling, declarative business rules, and normalized systems to more practical ones, such as business-case development and performance indicators, and from more business-related topics, such as value modeling and service systems, to topics related to information architectures.

Competition authorities are increasingly interested in understanding the impact of their activities on markets and consumers. The goal is to improve competition policy rules and decision-making practices and to get robust evidence on the benefits of competition and competition policy for society as a whole. Discussions with competition authorities, practitioners and academics have shown the need to take stock of the experience gained in this field by the European Commission and to present it in an easily accessible way. The studies collected in this volume – prepared by senior Commission officials and competition

policy experts – range from the ex post evaluation of specific policy interventions to the assessment of the broader impact of competition policy. The issues and topics examined include the following: objectives and scope of evaluations by the European Commission; description of counterfactual evaluation techniques used; conditions for a successful ex post evaluation of a competition policy intervention; a wide selection of individual cases covering a variety of economic sectors; applications in merger control, antitrust and State aid; direct benefits of competition policy interventions for consumers; deterrent effects of such interventions on market participants; and macroeconomic outcomes in terms of job creation, productivity and GDP growth. This matchless book assembles within a single volume all that is needed for competition policy analysts and practitioners to undertake ex post economic evaluations. While its collection of state-of-the-art ex post evaluation studies has a clear value for competition authorities, it is sure to be welcomed as well by competition law practitioners in the private sector, who will greatly appreciate the effort made to cast a critical eye on decisions taken in the past. Moreover, it allows for addressing some of the new challenges facing competition policymakers. Fabienne Ilzkovitz is Principal Advisor responsible for the economic evaluation of competition policy within the Directorate-General for Competition of the European Commission, and since 2014, she has coordinated various ex post evaluation projects in the Directorate-General. She is also Associate Professor of Economics in the Solvay Brussels School of Economics and Management at the Université Libre de Bruxelles, Belgium. Adriaan Dierx is Senior Expert on ex post economic evaluation within the Directorate-General for Competition of the European Commission. He has managed a number of studies aimed at assessing the economic impact of the European Commission's competition policy

Organizing Corporate and Other Business Enterprises is a one-volume treatise detailing the various aspects of setting up small business enterprises. Among the business entities discussed are individual proprietorships, general and limited partnerships, closely held corporations, not-for-profit corporations, and limited liability companies. Tax, financing, and management considerations are reviewed. The publication covers much more than the title indicates--it deals not just with organizing business enterprises but also with selected, tangential problem areas--e.g., fiduciary obligations of officers and directors, managing risk, employee benefits, etc. This publication is a practice guide to legal and tax factors to be considered in selecting a form of business organization. It is intended for the attorney who is advising proposed or existing small businesses. Organizing Corporate and Other Business Enterprises provides assistance from the inception of an enterprise through the death of the owners or the termination of the enterprise. Coverage includes: strong federal tax analysis, which is especially important for choice of entity classification, including S corporations; corporate domicile; promoter's rights; and initial capitalization. • Updated annually. • First published in 1949. • Revised Sixth Edition published in 1998.

constitutional and other high courts continue to use the old, traditional interpretative tools in constitutional adjudication. The book is divided into four parts. Part I contains three chapters elaborating the theoretical basis for the discussion. Part II examines the topic from a comparative perspective, representing those European countries where populism is most prevalent, including Austria, Croatia, the Czech Republic, Greece, Hungary, Italy, Poland, Romania, Spain, and the United Kingdom. Part III extends the focus to the United States, reflecting how American jurisprudence and academia have produced the most important contributions to the theory of constitutional interpretation, and how recent political developments in that country might challenge the traditional understanding of judicial review. This section also includes a general overview on Latin America, where there are also some populist governments and strong populist movements. Finally, the editors' closing study analyses the outcomes of the comparative research, summarizing the conclusions of the book. Written by renowned national constitutional scholars, the book will be essential reading for students, academics and researchers working in Constitutional Law and Politics.
