JVC HRXVC11B Progressive Scan DVD/VCR Combo Player Convenience and practicality combine in this DVD/VCR combo player from JVC! Watch your VHS or DVD movies whenever you want with the expedience of a system that can play both. A myriad of playback formats as well as a progressive scan output make for an impressive value.

Antistatic sprays from several different manufacturers are examined. The sprays are examined for contamination potential (i.e., outgassing and nonvolatile residue), corrosiveness on an aluminum mirror surface, and electrostatic effectiveness. In addition, the chemical composition of the antistatic sprays is determined by infrared spectrophotometry, mass spectrometry, and ultraviolet spectrophotometry. The results show that 12 of the 17 antistatic sprays examined have a low contamination potential. Of these sprays, 7 are also noncorrosive to an aluminum surface. And of these, only 2 demonstrate good electrostatic properties with respect to reducing voltage accumulation; these sprays did not show a fast voltage dissipation rate however. The results indicate that antistatic sprays can be used on a limited basis where contamination potential, corrosiveness, and electrostatic effectiveness is not critical. Each application is different and proper evaluation of the situation is necessary. Information on some of the properties of some antistatic sprays is presented in this document to aid in the evaluation process. Ming, James E. Goddard Space Flight Center

"As an account of growing up female, it is a fit companion piece to Mary McCarthy's classic *Memoirs of a Catholic Girlhood*."—LeAnne Schreiber, *The New York Times*.

This practical sourcebook has been specially prepared to give you an at-a-glance guide to quality video program-making on a modest budget. Emphasis throughout is on excellence with economy; whether you are working alone or with a small multi-camera group. The well-tried techniques detailed here will steer you through the hazards of production, helping you to avoid those frustrating, time-wasting problems, and to create an effective video program. For many years *Video Production Handbook* has helped students and program-makers in a wide range of organizations. Now in its thoroughly revised 3rd edition, *Video Production Handbook* guides you step-by-step, explaining how to develop your initial program ideas, and build them into a successful working format. It covers the techniques of persuasive camerawork, successful lighting and sound treatment, video editing...etc. You will find straightforward up-to-the-minute guidance with your daily production problems, and a wealth of practical tips based on the author's personal experience. In this extended edition, you will see how you can use quite modest

chromakey facilities and visual effects to create the magic of virtual reality surroundings. Gerald Millerson's internationally acclaimed writings are based on a long and distinguished career with the BBC. His lecturing background includes TV production courses in the United States and UK. His other books for Focal Press have become standard works in a number of languages, and include his classic course text Television Production 13th ed, Effective TV Production 3rd ed, Video Camera Techniques 2nd ed, Lighting for TV and Film 3rd ed, Lighting for Video 3rd ed and TV Scenic Design.

This revision of the classic book on CCTV technology, CCTV Surveillance, provides a comprehensive examination of CCTV, covering the applications of various systems, how to design and install a system, and how to choose the right hardware. Taking into account the ever-changing advances in technology using digital techniques and the Internet, CCTV Surveillance, Second Edition, is completely updated with the recent advancements in digital cameras and digital recorders, remote monitoring via the Internet, and CCTV integration with other security systems. Continuing in the celebrated tradition of the first edition, the second edition is written to serve as a useful resource for the end-user as well as the technical practitioner. Each chapter begins with an overview, and presents the latest information on the relevant equipment, describing the characteristics, features and application of each device. Coverage of aging or obsolete technology is reduced to a historical perspective, and eight brand new chapters cover digital video technology, multiplexers, integrated camera-lens-housing, smart domes, and rapid deployment CCTV systems. Serves as an indispensable resource on CCTV theory Includes eight new chapters on the use of digital components and other related technologies that have seen a recent explosion in use Fully illustrated, the book contains completely updated photographs and diagrams that represent the latest in CCTV technology advancements
